

FCC ID: CWR473T

Operation Description:

There are a on/off switch and 2 control sticks on the EUT. Turn on the on/off switch, the left control stick controls the forward/backward movement of the car, the right control stick controls the left/right movement of the car.

Circuit Description:

The brief circuit description is listed as follows:

- Q1 and the crystal circuit act as Local Oscillator.
- Q2 and associated circuit act as RF amplifier.
- TX2 and associated circuit act as modulation signal generator.

Antenna Used:

A permanent wire antenna has been used.
