> QUESTION #1:
> EUT size (160 x 130 mm) is bigger than the palm of hand, please add 15.19

[ZACTA] Instead of 15.19 statement, FCC logo is displayed in the label of the device because it belongs to FCC 15B DoC.

Reference: Attached FCC 15B Doc report *Not exhibits

> QUESTION #2:
> Per Block Diagram, External antenna is used, however, Printed Antenna / Chip Antenna is stated as Antenna in the report. Please revise the wrong one.

[ZACTA] Block Diagram was revised. Please find attached Revised Block Diagram.
And the "Chip antenna" that had been described to the test report was corrected to "Printed antenna".
Please find attached Revised Test Report.

Reference: Attached Antenna Information *Not exhibits

> QUESTION #3:

>> From Operational description, EUT is powered by either AC Adapter or Battery, however, from Test Setup photos, only AC Adapter operation mode was tested for Radiated emission. Please measure Battery operation mode in three orthogonal planes.

[ZACTA] We measured in Battery operation mode (three-axis) and revised the test report.
Please find attached Revised Test Report and Revised Test Setup Photos.

> QUESTION #4:

> Since External Photos are requesting for short term confidentiality, please revise the label location drawings.

[ZACTA] Since we have revised the label location drawings, please find attached Revised Label information.

We appreciate your help to this matter.
