

Power door locking switches

- 1) Lock
- 2) Unlock

All doors and the rear gate can be locked and unlocked by the power door locking switches located at the driver's side and the front passenger's side doors.

To lock the doors, push the front side of the switch.

To unlock the doors, push the rear side of the switch.

When you close the doors after you set the door locks, the doors remain locked.

NOTE

Make sure that you do not leave the key inside the vehicle before locking the

doors from the outside using the power door locking switches.

■ Key lock-in prevention function

This function prevents the doors from being locked with the key still in the ignition switch.

▼ Behavior with key lock-in prevention function operational

With the driver's door open, the doors are automatically kept unlocked even if the door locking switch is pushed to the front ("LOCK") position.

▼ Behavior with key lock-in prevention function non-operational

- If the lock lever is turned to the rear ("LOCK") position with the driver's door open and the driver's door is then closed with the lock lever in that position, the driver's door is locked.

- If the spare key is used to lock the driver's door from the outside of the vehicle, the door is locked.

The setting of this function to operational/non-operational status can be changed by a SUBARU dealer. Contact a SUBARU dealer for details.

NOTE

When leaving the vehicle, make sure you are holding the key before locking the doors.

Remote keyless entry system

CAUTION

- Do not expose the transmitter to severe shocks, such as those experienced as a result of dropping or throwing.
- Do not take the transmitter apart except when replacing the battery.
- Do not get the transmitter wet. If it gets wet, wipe it dry with a cloth immediately.

■ FCC WARNING

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules and with RSS-210 of Industry Canada. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Two transmitters are provided for your vehicle.

The keyless entry system has the following functions.

- Locking and unlocking the doors and rear gate without a key
- Unlocking the rear gate without a key
- Sounding a panic alarm
- Arming and disarming the alarm system. For detailed information, refer to the "Alarm system" section in this chapter.

The operable distance of the keyless entry system is approximately 30 feet (10 meters). However, this distance will vary depending on environmental conditions. The system's operable distance will be shorter in areas near a facility or electronic equipment emitting strong radio waves such as a power plant, broadcast station, TV tower, or remote controller of home electronic appliances.

The keyless entry system does not operate when the key is inserted in the ignition switch.

- : Rear gate unlock button
 - : Unlock/disarm button
 - : Lock/arm button
- A: Panic button
 1) Front
 2) Back

■ Locking the doors

Press the "B" button to lock all doors and the rear gate. An electronic chirp will sound once and the turn signal lights will flash once.

If any of the doors or the rear gate is not fully closed, an electronic chirp will sound five times and the turn signal lights will flash five times to alert you that the doors or the rear gate are not properly closed. When you close the door, it will automatically lock and then an electronic chirp will sound once and the turn signal lights will flash once.

■ Unlocking the doors

Press the "C" button to unlock the driver's door. An electronic chirp will sound twice and the turn signal lights will flash twice. To unlock all doors and the rear gate, briefly press the "C" button a second time within 5 seconds.

NOTE

If the interval between the first and second presses of the "C" button (for unlocking of all of the doors and the rear gate) is extremely short, the system may not respond.

■ Unlocking the rear gate

Pressing the "D" button opens the rear gate. An electronic chirp will sound twice and the turn signal lights will flash twice.

■ Illuminated entry

The interior (dome) light and the map light will illuminate when the "C" button is pressed. These lights stay illuminated for approximately 30 seconds if any of the doors or the rear gate is not opened. If the "C" button is pressed before 30 seconds have elapsed, these lights will turn off. The dome light must be set to the DOOR position in order for this function to operate.

A SUBARU dealer can change the illumina-

tion period setting of the interior light in accordance with your preference. Contact the nearest SUBARU dealer for details.

■ Vehicle finder function

Use this function to find your vehicle parked among many vehicles in a large parking lot. Provided you are within 30 feet (10 meters) of the vehicle, pressing the "B" button three times in a 5-second period will cause your vehicle's horn to sound once and its turn signal lights to flash three times.

NOTE

If the interval between presses is too short when you press the "B" button three times, the system may not respond to the signals from the remote transmitter.

■ Sounding a panic alarm

200714

A "PANIC" button is located on the back of the transmitter.

To activate the alarm, press the "PANIC" button once.

The horn will sound and the turn signal lights will flash.

To deactivate the panic alarm, press any button on the remote transmitter. Unless a button on the remote is pressed, the alarm will be deactivated after approximately 30 seconds.

■ Selecting audible signal operation

Using an electronic chirp, the system will give you an audible signal when the doors lock and unlock. If desired, you may turn

the audible signal off.

Do the following to deactivate the audible signal. You can also use the same steps to restore the function.

1. Sit in the driver's seat and shut all doors and the rear gate.
2. Hold down the UNLOCK side of the power door locking switch.
3. While holding down the "UNLOCK" side of the power door locking switch, pull the key out and re-insert it into the ignition switch at least 6 times within 10 seconds after Step 2.
4. Open and close the driver's door once within 10 seconds after Step 3.
5. The turn signal lights flash 3 times to indicate completion of the setting.

You may have the above settings done by your SUBARU dealer.

■ Replacing the battery

CAUTION

Do not let dust, oil or water get on or in the transmitter when replacing the battery.

When the transmitter battery begins to get weak, transmitter range will begin to decrease. Replace the battery as soon

as possible.

To replace the battery:

200902

1. Open the transmitter case using a flat-head screwdriver.

200716

2. Remove the old battery from the holder.

200717

- 1) Negative (-) side facing up

3. Replace with a new battery (type CR2025 or equivalent) making sure to install the new battery with the negative (-) side facing up.

4. Refit the removed half of the transmitter case.

After the battery is replaced, the transmitter must be synchronized with the keyless entry system's control unit. Press either the "P" or "L" button six times to synchronize the unit.

■ Replacing lost transmitters

If you lose a transmitter or want to purchase additional transmitters (up to four can be programmed), you should reprogram all of your transmitters for secur-
