RE: FCC Application Cover
Letter

To Whom It May Concern:

The radio used in the AMX Modero X touch panel is the Texas Instruments TRF7907A. The TRF7907A device is an integrated analog front end and data-framing device for a 13.56MHz Near Field Communication (NFC) system.

AMX LLC. is seeking limited modular approval to FCC 15.207:2015 and FCC 15.225:2015. The respective FCC ID number is as follows: CWU-SAA596805.

The test subject model is MXD-1000 containing the SAA5968-05 version of the NFC radio.

Sincerely,

Steve Donalson
Sr. Compliance Engineer
