

Fig.A Front view of the
TECOM Model T-2000A in a
Styrofoam holder for SAR
testing. Note that the antenna is
angled backwards.

Fig. B-1 Placement of the TECOM Model T-2000A against the experimental phantom used for SAR measurements (view from the rear of the head model).

Fig. B-2 Placement of the TECOM Model T-2000A against the experimental phantom used for SAR measurements (view from the front of the head model).
