RE: FCC ID: D6XBT3010
Attention: JY Chen

I have a few comments on this Application.

- 1 The report states that the maximum conducted output power is 27.99 mW. The 731 states the output power plus the gain of the antenna. Please note that where possible the conducted power is listed on the grant. Thus, the power listed will be 28 mW conducted. This is for your information, no action is needed on your part.
- 2 The first page of installation guide 1 refers to a model 3030, yet this product is the model 3010. Please correct the installation guide 1 to reflect the correct model.
