Subject: Cover Letter for FCC application for Class II Permissive Change

To whom it may concern:

This Model SM 100 is a Limited Modular Digital Transmission System operating in the 2.4GHz ISM band. It is used only in the Garrett Metal Detectors Model PD6500i walk-through security metal detector and receives power and control signals from the PD6500i. It is installed and maintained by Garrett Field Service personnel.

This is to seek a Class II Permissive Change on the Model SM 100 to allow an external antenna connected to the u.FL connector on the PCB inside the module and installed in a hole in the top of the PD6500i as compliant with FCC 15.247.

FCC ID: DBDSM100-00000

Sincerely,

Robert Podhrasky
Sr. VP, COO
