28 November 2011

To whom it may concern,

Regarding FCC ID label placement for this application, Lectrosonics, Inc. wishes to place the label inside the battery compartment. This location will offer and ensure the end user opportunity to view the label before operation. The identifier label will be readily viewable each time the battery is removed or replaced. The equipment is sold without the battery offering the end user exposure to the label before operation. This location will help ensure the longevity of the label as this equipment will be frequently handled.

The cylindrical shape of the HH handheld wireless microphone makes it difficult to engrave labels on its rounded outside surfaces using our laser marking equipment. Also, in our experience a printed label wears away quickly on a hand held device of this sort.

Sincerely,

A handwritten signature in cursive script, appearing to read "Robert A. Cummings".

Robert Cummings
