RE: ATCB006734 – Original Equipment

FCC ID: DD4UR1HA for Shure Inc.

I have a few comments on this Application. Please **do not put confidential information** in your responses to these questions because the response letter will not be held confidential by the FCC. Depending on your answers there may be more questions.

1. For Your Information – The FCC has made it clear that the whole EUT must be covered by SAR plots. This includes the whole EUT antenna. However, due to the age of the SAR test report, I will accept your word that there are no high SAR values from the EUT antenna area although this is not shown via SAR plots. For all future applications involving SAR evaluation, I will require SAR plots covering the whole profile of the EUT, no exceptions. Otherwise the FCC may dismiss the equipment authorization issued by ATCB.

Richard Fabina

Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
