FCC ID: DGFLM15G11N - Class II Permissive Change

To whom it may concern,

Attached is the Class II Permissive Change Certification application for FCC ID: DGFLM15G11N. Class II PC is necessary to include a change in RF Exposure limits from MPE to SAR. The change will add body-worn (portable) configuration using carrying case accessory for the new 3M Company Hosts, Model: LM1-11N/LX25-11N Luminometers.

SAR Evaluation has been performed to address change in operating conditions listed in the original FCC Grant for the combined WLAN/BT module installed in the devices. There is no change in the design, circuitry or construction has been made by 3M Company to the previously certified module. This module has single antenna therefore, out-of-band signals are not intentionally correlated between outputs and are not intended to exhibit array gain.

A handwritten signature in black ink, appearing to read "Yuriy Litvinov".
