RE: FCC ID: DGIBC0129AAA190_ATCB004420
Attention: Daniel Lee

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that while the attestation states that the GSM and WLAN do not operate simultaneously, no description of how this is accomplished has been provided. Please expound on how the device prevents simultaneous operation. For example, you state that when a GSM signal is received the device drops out of WLAN mode. Is this an immediate function or is there a determined time in ms that the phone takes to accomplish this? Is there a time frame established with any "hand over" function? Please explain.
2. FYI – please note that the ERP powers between vertical and horizontal polarizations for the 850MHz appears to be greater than 15dB. Please confirm if this is correct.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
