FCC ID: DI2CT-EM2503

The following lists are the answers for the comments on Jun. 4, 2007, please kindly have a review on it:

1. Users Manual needs Pt. 15.21 statement.  
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**RE:** Please see Pg. 14 of (DI2CT-EM2503)UserMan.rev1.

2. Please upload label location photo exhibit.

**RE:** Please see Pg. 14 of (DI2CT-EM2503)UserMan.rev1.

When the CT-EM2503 module is integrated inside another device/product, then the outside surface of that device/product must display a label referring to the enclosed module. This exterior label can use wording such as "**Contains Transmitter Module FCC ID: DI2CT-EM2503**" or "**Contains FCC ID: DI2CT-EM2503**" although any similar wording that expresses the same meaning may be used.

Thank you very much.

This is all fine but where does the label that you uploaded as label exhibit go?

There is no "Contains Transmitter Module FCC ID: DI2C-EM2503" on the label submitted.

So... Please send photo of label placement of the label submitted. Review can continue when this is received.

Thank you,  
Doug Noble
