1 Confirm Your Receiver Model

If your receiver looks like one of these...

If your receiver looks like one of these...

If your receiver looks like one of these...

If your receiver looks like this...

If your receiver looks like one of these...

then Select the Right Key

Remote keys are included in this replacement remote kit.

Keys have two sides. Look on both sides to find the right key for your remote.

Use the key that looks like this

Use the key that looks like this

Use the key that looks like this

Use the key that looks like this

Use the key that looks like this

2

Install Your Selected Key

Note: If you are using the blue TV2 key that comes already installed in your remote, skip this step and proceed with the next step (*Insert the Batteries*).

3

Insert the Batteries

4

Making the Remote Work With Your Receiver

1

If you installed one of these keys, continue with **step 2** on this page.

If you installed this key, go to **page 14** inside this guide.

2

If you installed a UHF key, make sure the UHF antenna is installed on the back of the receiver.

3

SYSTEM INFO

Turn your receiver and TV on, and press **SYSTEM INFO** on the front of the receiver.

4

Confirm that you see the **System Information** screen.

5

Press **RECORD** on your remote. The remote address probably changes on the screen.

6

Using your remote, select **Done** on the **System Info** screen to confirm that your remote operates your receiver. If your remote has a blue number 2 key, you may need to go to your remote TV2 location to confirm your remote operates your receiver. If this is not working, go back to **step 5**.

Program the Remote to Control Your TV

1

Turn your TV on.

2

Press & hold the TV Mode button until all Mode buttons light up.

3

POWER

Press POWER.

4

Press the UP ARROW on the remote repeatedly (about 1 press per second) until your TV turns off.

5

Press POUND.

The TV Mode button flashes three times.

6

Press the POWER button to turn the TV on and try other buttons to make sure the code works. If you want to try another code, start over from [step 1](#).

Programming the Recover Button for TV2 Operation

For TV2 Remote Controls on
DuoDVR™ 522, DuoDVR™ 625,
Duo ViP® 222, DuoDVR™ ViP® 622 DVR,
and DuoDVR™ ViP® 722 DVR Receivers

Programming your RECOVER button allows you to easily regain satellite programming if you accidentally change TV channels or inputs.

Press & hold the
TV Mode button
until all Mode
buttons light up.

Press
STAR.

Enter the channel
number you tune
your TV to when you
watch satellite
programming.

Press
POUND.

Use the RECOVER button as described in
If You Lose Your Picture on the next page (S-6).

Placing Your Remote in Limited Mode

Limited Mode locks out all the TV mode operations except for TV power, Mute, and Volume. This prevents you from accidentally tuning away from satellite programming.

1

Press & hold the TV Mode button until all Mode buttons light up.

2

Press the PAGE UP button.

3

Press POUND.

To take the remote out of Limited Mode, use the PAGE DOWN button instead of the PAGE UP button in step 2.

If You Lose Your Picture (How to Use the RECOVER Button)

Use the RECOVER button to get back to watching satellite programming if you accidentally change channels or inputs on your TV.

1

Press and hold RECOVER until all mode buttons light up.

2

(Your screen may be different)

If you see System Info, live television, or the standby screen, proceed to step 4. Otherwise, continue to step 3.

3

Press RECOVER again & wait until the mode lights stop flashing. If you see System Info, live television, or the standby screen, go to step 4. If not, repeat this step until you do.

4

Press SELECT to resume watching TV.

Remote Operation

SAT Mode

To use the features described in this section, make sure you are in SAT mode by pressing the SAT Mode button. 
Note: Some features may not be available depending on your receiver model.

Volume & Mute Buttons

Control TV volume
Programming required (see S-4)

Receiver Power & TV Power

Top button turns the receiver on and off
Bottom button turns the TV on and off
Programming required (see S-4)

 Forward a videotape or DVD

Record
 Record on a videotape

Play
 Play a videotape or DVD

Number Buttons
 Enter a desired channel number on VCR

Remote key may be different than what is shown here

REMOTE CONTROL OVERVIEW

Use this full-function remote to control a variety of DISH receivers. Also, you can program the remote to control most of the popular brands of audio/video equipment like a TV, VCR, DVD player, or a second DISH satellite receiver. See *Programming for Other Equipment* on page 2.

Note: This remote control may have features not used by your receiver.

USING THE GUIDE

This guide makes it easy to set up and use your remote control. By now you've noticed that the pages at the beginning of this *User Guide* contain information on quick set up and remote control operation.

The rest of the guide contains in-depth information to help you get the most from your remote control, including controlling other equipment like TVs, VCRs, and DVD players.

REMOTE CONTROL MODES

Use the remote control's mode buttons to set the remote to the correct mode for the equipment. Be sure to program the remote to control other equipment as described on page 2.

To change the mode, press the button for the equipment you want to control. The mode button lights for two seconds to show you've set the remote to that mode.

If you program the remote to control other equipment, refer to the following for remote control operation instructions:

- TVs, page S-8 (at the beginning of this guide).
- VCRs and DVD players, page S-9.
- DISH satellite receivers, page S-7.
- Stereo equipment uses only these buttons: **SELECT** (to change inputs), **MUTE**, **VOLUME**, and **POWER**.

HOW THE REMOTE COMMUNICATES

Depending on how the remote is set up, the remote control may use UHF radio signals, IR signals, or both to control the receiver. However, only IR signals are used to control other equipment.

- IR signals travel short distances (up to 40 feet) and cannot go through walls or other solid objects. Point the remote control directly at the equipment you want to control, with no objects to block the signal path.
- UHF signals travel longer distances than IR signals and can go through walls and other solid objects. Because these signals travel so far, the receiver may respond to signals from other nearby remote controls. To handle this problem, you may want to change the remote and receiver addresses (see page 12).
- If you're set up to use UHF, make sure that the UHF remote antenna is attached to the receiver's back panel **REMOTE ANTENNA** input so it can receive the UHF remote signals.

PROGRAMMING FOR OTHER EQUIPMENT

Page S-4 at the beginning of this guide shows you how to program the remote to control a TV. The following section uses a different method to program the remote to control a TV or other equipment (such as a VCR, DVD player, tuner, amplifier, or a second TV). You can program the remote by either following the instructions in *Programming Using Equipment Code Tables* on page 4, or the *Scanning for Equipment Codes* procedure described on page 6.

COMBINATION EQUIPMENT (FOR EXAMPLE, TV/VCR)

When programming the remote to control combination equipment, such as a TV/VCR or a TV/DVD, program the remote control in one mode, and then repeat the procedure in the other mode. For example, to program the remote to control a Magnavox TV/VCR using code 887, follow the instructions to program the remote to control the TV using

code 887, and then repeat the instructions for the VCR using code 797. Put the remote in TV mode to use the TV or VCR mode to use the VCR.

LIMITED MODE

You can program your remote control in Limited Mode to keep from accidentally changing the channel on your TV or VCR. When Limited Mode is enabled, you cannot select TV mode. If you press the TV button while TV mode is programmed in Limited Mode, the TV button flashes and the SAT button lights, telling you cannot switch to TV mode. The remote then moves back to SAT mode.

When you use the remote to control your TV in Limited Mode, you are only able to use the POWER, MUTE, and VOLUME buttons to control your TV. Also, when you use the remote to control your VCR in Limited Mode, you are only able to use the POWER and VCR function buttons. The section *Programming Using the Equipment Code Tables* has a step that tells the remote control to go into Limited Mode. Also, a quick way to put the remote in Limited Mode is on page S-6.

Note: Limited Mode cannot be used with audio amplifiers.

FIXED CHANNEL MODE

You can program your remote control in Fixed Channel Mode to automatically set the TV and/or VCR to a given channel when you press either RECOVER or the SAT button.

SETTING (OR CHANGING) FIXED CHANNEL MODE FOR TV AND/OR VCR

- 1** Press and hold the TV or VCR mode button until all four mode lights illuminate.
- 2** Press the STAR key (*). Enter a channel, using two or three digits between 02 and 125. For example, to set channel 25, enter *25.
- 3** Press the POUND (#) key. The TV or VCR mode button flashes three times.

REMOVING FIXED CHANNEL MODE FOR TV AND/OR VCR

- 1 Press and hold the TV or VCR mode button until all four mode lights illuminate.
- 2 Press the STAR (*) key followed by two zeros (*00).
- 3 Press the POUND (#) key. The TV or VCR mode button flashes three times.

PROGRAMMING USING EQUIPMENT CODE TABLES

You can set up the remote to control other equipment using the equipment code tables listed on page 16 and the modes as shown on page 1. To control a receiver in AUX mode, see page 8.

Instructions	Additional Information
1 Turn the equipment on.	Use the equipment's front panel buttons or its remote control.
2 Find the brand name of the equipment in the tables starting on page 16.	If the brand isn't listed, see <i>Scanning for Equipment Codes</i> on page 6.
3 Press and hold the mode button until all the other mode buttons light up, and then let go of the button. The mode button flashes.	For example, hold the TV mode button for a TV until all of the other mode buttons light. When you let go, TV mode button flashes.
4 <i>For AUX mode only.</i> Press 0 for a second TV, or 1 for a second VCR, or 2 for a tuner, or amplifier.	This step is for programming the kind of equipment that should be programmed in AUX mode. If you're not programming in AUX mode, skip to step 5.
5 Enter one of the three-digit equipment codes from the table using the number buttons.	The three-digit equipment code should be for the brand name of your equipment that you found in step 2.

Instructions	Additional Information
<p>6 If you want to program Limited Mode, press 1. If not, skip to step 7.</p>	<p>See <i>Limited Mode</i> on page 3 for more information.</p>
<p>7 Press POUND (#).</p>	<p>If you entered the code correctly, the mode button flashes three times.</p>
<p>8 Press POWER to turn off the equipment. If the equipment does not turn off, go to step 10.</p>	<p>If the code works, the equipment should turn off.</p>
<p>9 Turn the equipment back on and try some other buttons to make sure they work. If the code works for other buttons, stop here.</p>	<p>For example, sometimes POWER works when other buttons don't.</p>
<p>Note: If you have programmed your remote in Limited Mode, only the MUTE and VOLUME buttons work.</p>	
<p>10 If the code doesn't work, repeat steps 3 through 9 with another equipment code from the tables.</p>	<p>Try every code listed for your brand until one works for your equipment.</p>
<p>11 If you can't find a code that works, try <i>Scanning for Equipment Codes</i> that follows.</p>	

SCANNING FOR EQUIPMENT CODES

Instructions	Additional Information
1 Turn the equipment on.	Use the equipment's front panel buttons or its remote control.
2 Press and hold the mode button until all the other mode buttons light up, and then let go of the button. The mode button flashes.	For example, hold the TV mode button for a TV until all of the other mode buttons light. When you let go, TV mode button flashes.
3 <i>For AUX mode only.</i> Press 0 for a second TV, 1 for a second VCR, or 2 for a tuner, or amplifier. Then press the STAR (*) button.	This step is for programming the kind of equipment that should be programmed in AUX mode. If you're not programming in AUX mode, skip to step 4.
4 Press POWER.	This step puts your remote in the scan mode.
5 Press either the UP or DOWN ARROW repeatedly until the equipment turns off.	As you press the UP or DOWN ARROW, the remote tries each code in the memory to see if it can turn off your equipment. When the equipment turns off, you have found a code that might work. Note: The mode button for the equipment flashes rapidly eight times when you've scanned all the codes for that equipment.
6 Press POUND (#).	The mode button flashes three times if you have entered the code correctly. This step stores the code you found.

Instructions	Additional Information
<p>7 Turn the equipment back on and try some other buttons to make sure they work.</p>	<p>Press POWER to turn the equipment back on. Try some other buttons to make sure they work. Sometimes POWER works when other buttons don't.</p>
<p>8 If necessary, repeat this procedure until you've tried all the codes.</p>	<p>You may need to repeat the scan to find the best code for your equipment.</p>
<p>9 Once you find a code that works, consider using Limited Mode.</p>	<p>See page S-6, <i>Placing Your Remote in Limited Mode</i> for putting your remote in Limited Mode.</p>

SWITCHING BETWEEN TV AND AMPLIFIER VOLUME CONTROL

When you set up the remote to control a TV, the **MUTE** and **VOLUME** buttons control the TV volume, even if your remote control is in **SAT** mode. However, if you want to use the **AUX** mode to control a tuner or amplifier that has a volume setting, you can set up the remote to control the tuner or amplifier's volume instead of the TV volume while your remote control is in **SAT** mode. Follow the instructions in the left column to switch controlling volume in **AUX** mode. To change back to controlling the TV volume in **SAT** mode, follow the instructions in the right column.

Control Amplifier Volume	Control TV Volume
<p>1 Press and hold the AUX mode button for three seconds, and then let go of it. The AUX mode button blinks.</p>	<p>1 Press and hold the TV mode button for three seconds, and then let go of it. The TV mode button blinks.</p>
<p>2 Press the POUND (#) button.</p>	<p>2 Press the POUND (#) button.</p>

Control Amplifier Volume

- 3 Press the plus (+) side of the VOLUME button.
- 4 Press the 0 number button.
- 5 Press the POUND (#) button.

The AUX mode button flashes three times.

MAKE SURE THE REMOTE CONTROLS THE AMPLIFIER'S VOLUME:

- 6 Press the SAT mode button.
- 7 Press the plus (+) and minus (-) sides of the VOLUME button.
- 8 The equipment's volume changes and the AUX mode button lights instead of the TV mode button.

Control TV Volume

- 3 Press the plus (+) side of the VOLUME button.
- 4 Press the 0 number button.
- 5 Press the POUND (#) button.

The TV mode button flashes three times.

MAKE SURE THE REMOTE CONTROLS THE TV'S VOLUME:

- 6 Press the SAT mode button.
- 7 Press the plus (+) and minus (-) sides of the VOLUME button.
- 8 The TV's volume changes and the TV mode button lights instead of the AUX mode button.

PROGRAMMING THE REMOTE TO CONTROL A SECOND RECEIVER IN AUX MODE

If you have another DISH satellite receiver installed, you can use this remote in AUX mode to control it along with your new receiver. When you program the remote to control the other receiver, the remote sends out IR and UHF (not UHF Pro) signals to the receiver. You can program the remote to control any other DISH satellite receiver, except for following:

- TV2 on Duo 322, DuoDVR 522 (also known as DISH Player-DVR 522), DuoDVR 625 (also known as DISH Player-DVR 625), DISH Player-DVR 942, Duo ViP 222 (also known as ViP 222), DuoDVR ViP 622 DVR (also known as ViP 622 DVR), and DuoDVR ViP 722 DVR (also known as ViP 722 DVR)
- DishPlayer 7100/7200

- 1 Turn on the other receiver. Use the SYSTEM INFO button on the front panel to open the System Info screen.

Note: If you aren't sure how to access the System Info screen or if there isn't a SYSTEM INFO button on the front panel of your receiver, check your receiver's *User Guide*.

Write down the address shown: _____

- 2** Press and hold the AUX button until all the other mode buttons light up, and then let go of the button. The AUX button flashes.
- 3** Press the 3 button.
- 4** Use the NUMBER PAD to enter the address you wrote in step 1.
- 5** Press POUND (#). The AUX button blinks three times.
- 6** Press RECORD to make sure the address in the remote matches the address on the receiver.

READING OUT THE REMOTE CONTROL CODES

These instructions explain how to check the remote control code you put in the remote control when you set it up. Be sure to write them in the spaces provided on the inside back cover.

Instructions	Additional Information
1 Press and hold the mode button for the equipment you want the remote to control. When all the other mode buttons light up, let go of the mode button—that mode button should now be flashing.	For example, hold the TV mode button for a TV until all of the other mode buttons light. When you let go, the TV mode button flashes.
2 Press the POUND (#) button <i>twice</i> . The mode button flashes the number for each digit of the equipment code, with a pause between the groups of flashes. A quick flash is for zero.	For example, if the code is 570, the mode button flashes five times, pauses, flashes seven times, pauses, and quick flashes for zero.

For AUX mode, the first group of flashes tells you what type of device the AUX mode controls, then the following flashes tell you each digit of the equipment code. A quick flash (zero) before the three-digit code is for a TV; one regular flash is for a VCR or DVD player; and two flashes is for a tuner or amplifier.

For a satellite receiver programmed in AUX mode, the group of flashes tells you the address number.

For example, if the TV code is 570, the AUX mode button flashes once quickly, pauses, flashes five times, pauses, flashes seven times, pauses, and quick flashes for zero.

For example, if the AUX mode button is set to control a satellite receiver with address 5, the AUX mode button flashes five times.

DISCRETE CODES FOR LEARNING REMOTES

Note: Discrete codes are only used by IR remotes (either the TV1 remote or a universal remote).

Remote control discrete On and Off IR commands are used by installers when programming macro commands into universal remotes. Using an On-only or Off-only command is more effective than a toggle On/Off command when trying to ensure the satellite receiver is reliably in one state or the other. To use discrete power commands, complete the following:

- 1 Program the DISH remote to the desired remote address (see *Changing the Remote and Receiver Address* in the next section).
- 2 Hold the SAT mode button until all mode buttons light, then release.
- 3 Press POWER (not TV POWER).
- 4 Press VOLUME UP for discrete power on, or VOLUME DOWN for discrete power off.
- 5 Press any other button when done to end this procedure.

AVOIDING REMOTE CONFLICTS

When your remote control uses UHF, you may experience interference from other nearby remotes. In situations where neighbors are near (apartments, townhouses, etc.), your receiver could be picking up signals from your neighbors' remotes. The instructions in this section describe how to avoid remote conflicts.

CHANGING THE REMOTE AND RECEIVER ADDRESS

One quick way to avoid remote conflicts is by changing the address on your remote and receiver. If you notice that your receiver is changing channels or opening menus but you're not using the remote control, a quick change of address should fix the problem.

- 1 Press **SYSTEM INFO** on the receiver's front panel. The System Info screen displays and shows the **Remote Address**.

Note: If you aren't sure how to access the System Info screen or if there isn't a **SYSTEM INFO** button on the front panel of your receiver, check your receiver's *User Guide*.

Write down the remote address of the UHF remote:

- 2 Press and hold **SAT** on your UHF remote control (associated with the TV which is having interference issues) for about three seconds, until all of the mode buttons light up, and then let go of **SAT**.
- 3 Use the **NUMBER PAD** to enter any number between 1 and 16, but not the one you wrote in step 1.
- 4 Press **POUND (#)**. If you entered the address correctly, **SAT** flashes three times. Write down the number you entered in the space provided on the inside back cover.
- 5 Press **RECORD**. Make sure the **Remote Address** you see on the System Info screen is the same as the one you entered in step 3. If it isn't, the remote cannot control the receiver. Press **RECORD** a second time.
- 6 Select **Done** to close the System Info screen.

CHANGING THE UHF FREQUENCY USING THE A/B SWITCH—DISH PLAYER-DVR 942, DUO ViP 222, DUODVR ViP 622 DVR, AND DUODVR ViP 722 DVR ONLY

All receiver models, *except* the DISH Player-DVR 942, ViP 222, ViP 622 DVR, and ViP 722 DVR, must use switch position A or the remote does not control the receiver.

Your remote has a switch to change the UHF frequency that your remote control uses. It comes preset to the A position but you can change the setting to the B position to lessen the likelihood of any other UHF remote interfering with yours.

- 1 Remove the battery cover from the remote control.
- 2 Use a small screwdriver or a paper clip to carefully change the setting.
- 3 Put the battery cover back on the remote control.
- 4 Use the **SYSTEM INFO** button on the front panel to open the System Info screen.
- 5 Press **RECORD** on the remote control.
- 6 Make sure the remote address on the System Info screen shows the correct band information:
 - Switch Position A—**IR/UHF Pro Band A**
 - Switch Position B—**IR/UHF Pro Band B**

SETTING UP A TV1 UHF PRO REMOTE FOR THE DUODVR 522 AND DUODVR 625 ONLY

Use these special instructions only if you are going to use the green 1 UHF Pro key to control the TV1 side of your DuoDVR 522 or 625 (also known as DISH Player-DVR 522 or 625).

If you have a DuoDVR™ 522 or 625

and want to use UHF Pro with TV1, use this key:

When you are finished setting up the remote control, you'll be able to operate the TV1 side of your DuoDVR 522 or DuoDVR 625 from long distances.

- 1 Make sure the key is installed as described on pages S-1 and S-2.
- 2 Make sure the UHF Antenna is attached to the REMOTE ANTENNA input on the back of the receiver.
- 3 Using the receiver's front panel buttons, press **MENU**. Select the following on-screen items in this sequence:
 - a. **System Setup**
 - b. **Installation**
 - c. **TV1 UHF Pro Setup**
- 4 Select **Enable** from the **TV1 UHF Pro Setup** screen.
- 5 Select **System Info** to open the System Info screen.

- 6 Use the **ARROW** buttons to move the highlight to the TV1 remote address (the **1 Rem Addr** box as shown below). This is important—if you do not move the highlight, your remote changes the receiver's TV2 remote address (the **2 Rem Addr** box) and causes your Remote Control 1 to control the TV2 side of your receiver.

Note: Highlight the **1 Rem Addr** (the lighter area in the graphic above) using the **ARROW** buttons on the remote.

- 7 Press the **RECORD** button on the green TV1 remote control you are setting up. If you get a warning that tells you to pick another address, continue on to the next step. If no warning appears, go to step 15 of this procedure.
- 8 Select **OK** using the front panel button to clear the warning message and return to the System Info screen.
- 9 On the remote control, press and hold the **SAT** mode button for about three seconds, until all the mode buttons light up, and then let go of the **SAT** button. The **SAT** mode button blinks.
- 10 Use the number buttons to enter any number from 1 to 16, except for the address shown for **2** on your screen.

Write down the number you entered: _____

- 11 Press the **POUND (#)** button. If you entered the address correctly, the **SAT** mode button flashes three times.
- 12 Highlight the **1 Rem Addr** using the **ARROW** buttons on the front panel of the receiver.
- 13 Press **RECORD**.
- 14 Make sure the System Info screen shows **UHF** and that this address matches the number you entered in step 10.
- 15 Using the remote, select **Done** to close the System Info screen. If nothing happens, use the front panel buttons to highlight the **1 Rem Addr**. Press **RECORD**, and then select **Done**.

EQUIPMENT CODES

These tables contain the manufacturer codes for programming the remote to control your TV, a VCR, DVD player, or audio amplifier. Every attempt has been made to include all codes. If your equipment brand is not listed or if the codes do not work, the remote may not control your equipment. In some cases codes may operate some but not all buttons shown in this guide.

TV CODES

Programming in AUX mode: Use these codes to program in TV mode; however, if programming in AUX mode, press 0 before entering the TV code.

TV/VCR COMBO CODES

Programming for combination equipment: Program the remote control in TV mode using the TV code and then in VCR mode using the VCR code.

	TV Code	VCR Code
Magnavox	887	797
	888	798
Philips	891	801
	892	802
	893	803
	894	804
Quasar	860	770
	861	771
	862	772
	895	805
	896	806
RCA	863	773
	864	774
Samsung	755	755
	897	807
Sylvania	756	756

TV/DVD COMBO CODES

Programming for combination equipment: Program the remote control in TV mode using the TV code and then in VCR mode (or AUX—press 1 before entering the DVD code) using the DVD code.

	TV Code	DVD Code
Apex	757	757
Broksonic	752	752
Cytron	904	904
Panasonic	734	734
	765	765
RCA	749	749
Sansui	754	754
Sylvania	764	764
Toshiba	865	814
	866	815

TV/VCR/DVD COMBO CODES

Programming for combination equipment: Program the remote control in TV mode using the TV code, then in VCR mode using the VCR code, and then DVD in AUX mode (press 1 before entering the DVD code) using the DVD code.

	TV Code	VCR Code	DVD Code
Panasonic	900	810	882

TV/VCR/TUNER COMBO CODES

Programming for combination equipment: Program the remote control in TV mode using the TV code, then in VCR mode using the VCR code, and then tuner in AUX mode (press 2 before entering the tuner code) using the tuner code.

	TV Code	VCR Code	Tuner Code
Panasonic	867	796	797
	868	799	798
	869	808	799
	870	780	839
	871	781	838
	872	782	837

Table continues on next page

TV/VCR/TUNER COMBO CODES (CONTINUED)

	TV Code	VCR Code	Tuner Code
Panasonic	873	783	836
	874	784	833
	875	785	826
	876	786	825
	877	787	824

TROUBLESHOOTING

What's Happening	What's Wrong	What You Can Do
While performing a remote control procedure, the remote control stops working.	If you don't press a button for 20 seconds in a programming sequence, the remote shuts off its programming function.	Start over again.
You cannot find the key(s) shown on page S-1.	The keys have two sides.	Turn the keys over until you find the correct key.
When you press a button on the remote control, the equipment doesn't do what you expect.	<ul style="list-style-type: none"> • The remote may not be in the mode for the equipment you want to control. • The remote control needs to be pointed right at the TV (or other equipment). • The remote control may be missing batteries, the batteries in the remote may be inserted the wrong way, or maybe the batteries are weak or dead. • The remote isn't set up to control the equipment. 	<ul style="list-style-type: none"> • Press the correct mode button to set the remote to the mode for the equipment you want to control. • The remote control uses IR signals to control all equipment except for the receiver (when using UHF). IR signals travel only 40 feet or less and can't go through walls or other solid objects. You must point the remote control right at the equipment, with no objects to block the signal path. • If the batteries are missing or dead, put fresh AAA-size batteries in. If the remote has fresh batteries, check whether you put them in the right way. If you didn't, take them out and put them in the right way. • Make sure you set up the remote to control all the equipment you want to use. See <i>Program the Remote to Control Your TV</i> on page S-4 and <i>Programming for Other Equipment</i> on page 2.
The receiver does things even though you didn't press any remote control buttons.	UHF signals from a neighbor's remote may be controlling your receiver.	See <i>Avoiding Remote Conflicts</i> on page 12 for instructions to correct this problem.
Your picture is snowy (or blue or black).	You have accidentally changed the channel on your TV.	Make sure your TV (and VCR if connected) is tuned to the correct channel. Also try using the RECOVER button as described on page S-6.

What's Happening	What's Wrong	What You Can Do
Your remote control isn't working	<ul style="list-style-type: none"> • The remote control is in the wrong mode. • You might be using the wrong remote control (TV1 or TV2). • Your batteries are worn out. • The remote control's A/B switch is in the wrong position. 	<ul style="list-style-type: none"> • Make sure the remote control is in the correct mode. For example, if you want to use the satellite receiver, put the remote control in SAT mode (see <i>Remote Control Modes</i> on page 1). • Make sure you are using the correct remote control (TV1 or TV2) for your locations (multi-room receivers only). • Change the batteries as described on page S-2. • Check the A/B switch setting as described on page 13. <p> For all receivers, <i>except</i> for the DISH Player-DVR 942, ViP 222, ViP 622 DVR, and ViP 722 DVR, leave the A/B switch in the A position.</p>
When you press the remote control MUTE or VOLUME button, nothing happens.	<ul style="list-style-type: none"> • The remote control may not be set up. • Maybe you're trying to control TV volume but you set up the remote to control a tuner or amplifier in AUX mode. 	<ul style="list-style-type: none"> • See <i>Programming the Remote to Control Your TV</i> on page S-4 and <i>Programming for Other Equipment</i> on page 2. • Set up the remote to control <i>either</i> TV volume <i>or</i> tuner/amplifier volume, whichever you want. See page 7.
Your UHF Pro remote control does not work well from far away.	You may be experiencing interference from objects near your receiver antenna.	<ul style="list-style-type: none"> • Make sure the UHF antenna is connected to the receiver and not touching anything else. • Vary the tilt angle of the receiver's UHF antenna. Locate the UHF antenna tip away from other electronics equipment or metal surfaces, even if separated by wooden shelving. • Move the receiver to different locations. For best results, place the receiver as high as possible, above all other equipment in your entertainment center. • Place the UHF antenna outside the entertainment center by using a coaxial cable to connect it to the receiver. • Move any nearby off-air antenna away from the UHF remote antenna. Do not place an off-air antenna on your receiver.
Your PIP (Picture-In-Picture) button isn't working.	<ul style="list-style-type: none"> • Your receiver doesn't use PIP. • Your receiver isn't in Single Mode. 	<ul style="list-style-type: none"> • Upgrade to a receiver with this feature. • Press the MODE button on the front panel (if available).

REGULATORY FACTORS

This device complies with Part 15 of FCC Rules. Operation is subject to the following two conditions:

1. this device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this device may void your authority to operate this equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Re-orient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.

Reference Tables

Write down your remote address, channel numbers/inputs, TV, VCR, DVD player, and stereo equipment codes as you program them for future reference.

Remote Address

Channel or Input for
Satellite Programming

If you enter a "1" as the last number of your code, your remote is in Limited Mode (see page 3 for more details).
