Subject: Requesting Class II permissive change for FCC ID: DLAWM-5220A

To Whom It May Concern:

The purpose of this letter is to request a Class II Permissive change for FCC ID:  
DLAWM-5220A.

We would like to change the frequency range from 636-700MHz to 636-697.925MHz.  
All design including electronic, electrical and mechanical designs remain the same except  
the above-mentioned change. We change the frequency by different set-up of software.

Best Regards
