RE: Declaration of Compliance to RF Exposure Limits for Humans

The WM-5320, WM-5320A and WM-5320H wireless microphone complies with the RF exposure limits for humans as called out in RSS-102. The wireless microphone picks up sound and transmits to FM radio. It is exempt from RF Evaluation based on its operating frequency of 690-806 MHz, and maximum output power of 134.9 milliwatts. This would be less than the 1.5 watts requirement for a mobile device, or the 200 milliwatts requirement for a portable device, operating at 690-806 MHz.
