Re: Model Number CDM812-743  
FCC ID# DNY020MCELL0800

To Whom It May Concern:

We desire to have our certification for the above referenced hardware dismissed. We have determined that the device was not properly calibrated prior to certification testing and the test results provided in the original application for certification are not representative of the final production model. We have corrected this issue and will be submitting a new application for certification under the same model and FCC ID if the dismissal is granted.

No production units of the previously certified configuration have been built, delivered or put in service.

Thank you for your assistance,

A handwritten signature in black ink, appearing to read "Tom W. Foss".
