RE: FCC ID: DT9R-9800

Attention: Vivi Wang

I have a few comments on this Application.

- 1 Your application appears to state that you use 433 MHz as a video/audio transmitter. Please note that this is not possible under 15.231. Also, your operational description is not clear as to the intent of this device. Under the conditions you specify (video/audio transmitter), this device is not certifiable. You must show that this device is used for non-periodic control code transmission and cannot be used to transmit data/video/audio signals. Please clarify and correct your documentation to be in compliance with the requirements of 15.231 (i.e. use of 433 MHz as a control code transmitter only not transmitting data, voice or video).
- 2 Please provide block diagrams that can be rotated. It is not possible to clearly identify the parts as the pdf will not allow rotating the page 90 degrees.
- 3 Please provide a manual that can be easily read. I must be able to rotate the page in order to view the document. The document provided is protected and will not allow rotating 90 degrees. Please provide all documentation either so I can rotate the page to view them easier, or provide them in an rotated position so I can easily read them.
- 4

A handwritten signature in black ink that reads "Dennis Ward". The signature is written in a cursive, flowing style.

Dennis Ward

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
