

A/V Wireless Transmitter, using FM method for Audio/Video signal modulation. It has better signal to noise ratio than Amplitude Modulation. There are 4 channels to relative to the following frequencies : CH 1 : 2414 MHz & CH 2 : 2432 MHz & CH 3 : 2450 MHz & CH 4 : 2468 MHz, this device is used for surveying enviromenet sitnation or similar applications of Audio and Video signals transmission.
