Subject: FCC Part 15 Class B approval of our
Windows-based Terminal model WT3125SE

Dear Mr. Kuo:

We would like to submit our new Windows-based Terminal model WT3125SE to obtain FCC part 15 class B approval under FCC ID DYDWT3125. The attached manual is being revised to include this model designation. The functionality of this model is similar to our approved model WT3200LE (DYDWT3200), except we have added a serial port and a parallel port and a single chip solution 266 MHz CPU. The logic board and chassis have been modified to accommodate these changes.

With this letter, I have provided all the necessary documentation electronically and attached the radiated and conducted setup drawings. All the test equipment information has been included as part of the radiated and conducted test report.

Equipment List for the Radiated Measurement test:

Support and Test Equipment:

See Radiated Measurement data sheet

Equipment List for the Conducted Measurement test:

Support Equipment:

HP PC Model: HP Brio PC (DOC)

HP Serial Printer (FCC ID DS16XU2225)

HP Parallel Printer (DOC)

HP Monitor (DOC)

Test Equipment:

HP Spectrum Analyzer Model 85680B (RES BW: 30 KHz-100KHz, VBW: 10KHz-30KHz)

HP QP Adaptor Model 85650A

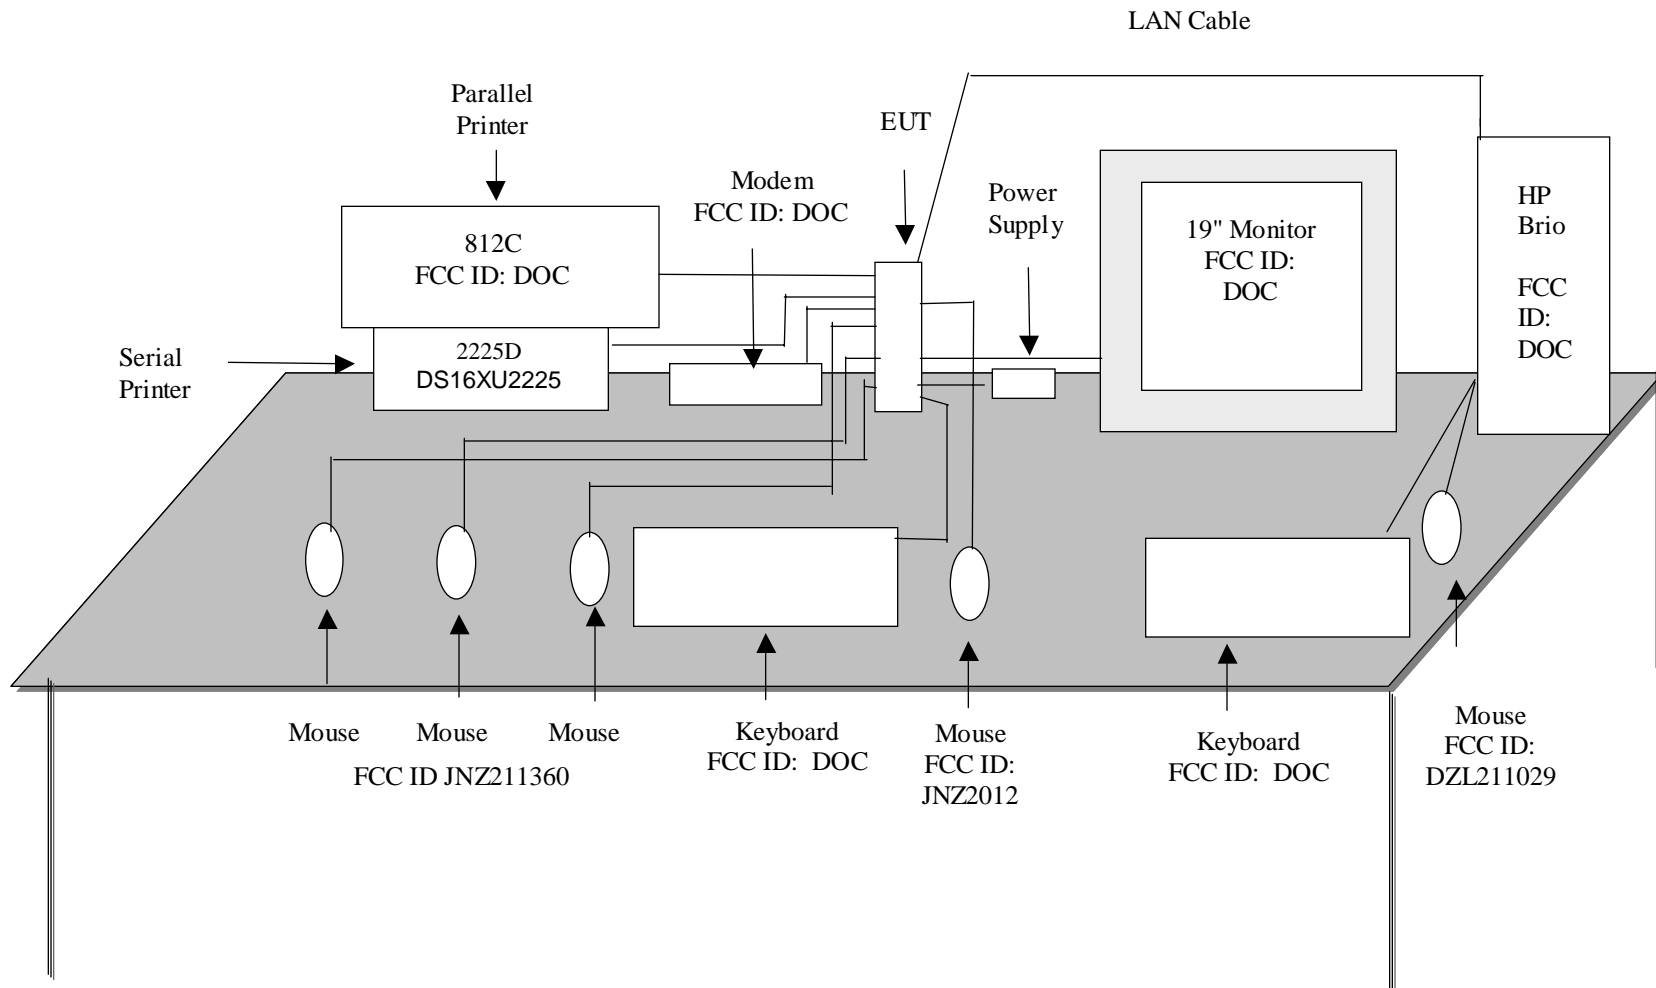

If you have any questions or need additional information, please contact me at 408.473.2458 (voice), 408.473.2245 (fax), or jnguyen@wyse.com (email).

Sincerely Yours,
