Subject: FCC Part 15 Class B approval of our
Windows-based Terminal model WT3235LE

Dear Mr. Kuo:

We would like to submit our new Windows-based Terminal model DYDWT3235LE to obtain FCC part 15 class B approval under FCC ID DYDWT3235. The Radiated and Line Conductive measurements were performed in accordance with EN55022 Class B. The functionality of this model is similar to our approved model T20 (DYDWT3235), except that the chassis is oriented along the horizontal rather than vertical axis.

With this letter, I have provided all the necessary documentation electronically and attached the radiated and conducted setup drawings. All the test equipment information has been included as part of the radiated and conducted test report.

Equipment List for the Radiated Measurement test:
Support and Test Equipment:
See Radiated Measurement data sheet

Equipment List for the Conducted Measurement test:
Support Equipment:
HP PC Model: HP Brio PC (DOC)
HP Printer (DOC)
HP Monitor (DOC)
Test Equipment:
HP Spectrum Analyzer Model 85680B (RES BW: 30 KHz-100KHz, VBW: 10KHz-30KHz)
HP QP Adaptor Model 85650A

If you have any questions or need additional information, please contact me at 408.473.2458 (voice), 408.473.2245 (fax), or jnguyen@wyse.com (email).

Sincerely Yours,

A handwritten signature in black ink, appearing to read "J. Nguyen". The signature is fluid and cursive, with a horizontal line underneath the name.
