

Information For T-RA18

The Trackball communicates with receiver using RF energy.

Operating carrier frequency is for Mouse device is 27.045 MHz

Band width of channel: 15kHz

The data is FSK modulated.

Radiated effective power of the device is: 2dBuA/met at 2 meter distance

Type of Antenna: Inductive loop, integrated on printed circuit board.

Thanks in advance and with the best regards.

Bharat Shah

EMC/Agency Engineer
