AEGIS LABS inc.

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for FCC Class II Permissive Change certification of an intentional unlicensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

This Class II Permissive Change is for approval of the 802.11b MiniPCI Type 3A Wireless Module (MN: WM3A2100, FCC ID: E2K24CLNS) installed in a Dell PPT Chassis with a set of Winstron NeWeb Corporation triple band antenna (MN: CAB-A). The chassis is used by the Latitude series of laptops. A Bluetooth module (FCC ID: IXMUB22111S) may also be installed in this chassis. The Wireless and Bluetooth module are not considered co-located as in the original grant.

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

Rick Candelas
