American TCB  
6731 Whittier Ave., Suite C110  
McLean, VA 22101

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for a Class II Permissive Change approval of an intentional unlicensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

This is a Class II Permissive Change approval of the Intel Wireless WiFi Link 4965AGN (MN: 4965AGN, FCC ID: E2K4965AGNM), which is a WLAN adapter (802.11a, 802.11b, 802.11g, and 802.11n). It was tested installed in the Mini PCI-E slot of the Dell host computer with a set of Acon & Wistron NeWeb Corp. Antennas continuously transmitting and receiving form Chain A, B, and C antenna ports.

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Candelas". The signature is written in a cursive, flowing style.
