MPE Calculations

Systems operating under the provision of 47 CFR 1.1307(b)(1) shall be operated in a manor that ensures that the public is not exposed to radio frequency energy levels in excess of the FCC guidelines.

The EUT will only be used with a separation of 20 centimeters or greater between the antenna and the body of the user or nearby persons and can therefore be considered a mobile transmitter per 47 CFR 2.1091(b). The MPE calculation for this exposure is shown below.

Using the Antennas with highest output power:

The peak radiated output power (EIRP) is calculated as follows:

Antenna	Frequency (GHz)	Power input to the antenna (P) (dBm)	Power gain of the antenna (G) (dBi)	EIRP (P+G) (dBm)	EIRP Log ^{-1(dBm/10)} (mW)
WNC	5	21.30	0.46	21.76	149.97
WNC	2.4	24.10	2.83	26.93	493.17
Foxconn	5	21.30	0.92	22.22	166.72
Foxconn	2.4	24.10	2.65	26.75	473.15

EIRP = P + G

Where

P = Power input to the antenna (mW).

G = Power gain of the antenna (dBi)

The numeric gain (G) of the antenna with a gain specified in dB is determined by:

Antenna	Frequency (GHz)	Antenna Gain (G) (dBi)	Numeric Antenna Gain Log ^{-1(dBm/10)} (dB)
WNC	5	0.46	1.11
WNC	2.4	2.83	1.92
Foxconn	5	0.92	1.24
Foxconn	2.4	2.65	1.84

 $G = Log^{-1}$ (dB antenna gain/10)

Power density at the specific separation:

Antenna	Frequency (GHz)	Power input to the antenna (P) (mW)	Numeric Power Gain of the Antenna (G) (dB)	Maximum Power Spectral Density S=PG/(4R ² π) (mW/cm ²)	Maximum Power Spectral Density Limit (mW/cm²)
WNC	5	134.90	1.11	0.030	1.00
WNC	2.4	257.04	1.92	0.098	1.00
Foxconn	5	134.90	1.24	0.033	1.00
Foxconn	2.4	257.04	1.84	0.094	1.00
WNC	5	134.90	1.11	0.030	1.00

 $S = PG/(4R^2\pi)$

Where

S = Maximum power density (mW/cm²)

P = Power input to the antenna (mW).

G = Numeric power gain of the antenna

R = Distance to the center of the radiation of the antenna (20cm = limit for MPE)

The maximum permissible exposure (MPE) for the general population is 1mW/cm².

The power density at 20 cm does not exceed the 1mW/cm^2 limit. Therefore, the exposure condition is compliant with FCC rules.
