The image shows a custom electronic circuit board (PCB) with a yellow solder mask. At the top, there is a 4-digit 7-segment display showing '88:88'. Below the display is a 12-pin ribbon cable connector. To the right of the display, there are several push buttons labeled 'LIGHT', 'STOP', 'START', 'RESET', 'CLEAR', and 'POWER'. A ruler is placed below the board for scale, showing measurements in centimeters. The PCB is populated with various electronic components, including resistors, capacitors, and integrated circuits. The overall design is compact and functional.
