

Dec. 26, 2014

Applicant Type of : SAMSUNG ELECTRO-MECHANICS CO.,LTD.
Product : ESL Graphic TAG
FCC ID : E2XST-GM6000
Model Name : ST-GM6000
Add Model Name : ST-GM6000N

We would like to add the variant mode that it's ST-GM6000N, it doesn't differ with electric and circuit because this model is adhered only NFC TAG on the PCB to basic model.

This NFC tag which is attached to the ST-GM6000 is passive device with no power of its own. This NFC tag is only contains information that other NFC device can read but does not read any information itself.

ST-GM6000 and ST-GM6000N is composed of the same circuit and the same PCB board. Just only difference is that NFC tag is attached on product or not.

Sincerely,

A handwritten signature in black ink that reads "DongSik Yoon".

Dongsik Yoon / Principal Engineer
