

1.1 PRODUCT DESCRIPTION

The model SWL-2000P (referred to as the EUT in this report) is a Direct Sequence Spread Spectrum wireless LAN, PCI network card. The EUT provides wireless communications between computers. The EUT is designed to be plugged into an ISA slot in a desktop computer. The EUT communicates with other wireless LAN cards using the frequency range from 2.411 GHz to 2.462 GHz. The EUT is powered from the desktop computer, and does not have an external power supply. The EUT uses a patch antenna attached to a left-turn SMA connector. This patch antenna has a 1.2 meter shielded coaxial cable.
