

Response to E05-000320-1

1. A confidentiality letter has been uploaded.
2. An operational description has been uploaded.
3. A user's manual has been uploaded.
4.
 - a. The test report has been revised to show the AC power was varied from 85% to 115%.
 - b. This modification was done on the portion that would only reduce the radiated emission, ie removing paint on the part that shielded the antenna, relocate antenna. Hence, conducted emissions is not needed since conducted emissions is a direct measurement.
