

PRINTRONIX®

M4L Mobile Printer

Administrator's Manual

READ THIS SOFTWARE LICENSE AGREEMENT BEFORE USING THIS PRINTER

Software License Agreement

CAREFULLY READ THE FOLLOWING TERMS AND CONDITIONS BEFORE USING THIS PRINTER. USING THIS PRINTER INDICATES YOUR ACCEPTANCE OF THESE TERMS AND CONDITIONS. IF YOU DO NOT AGREE TO THESE TERMS AND CONDITIONS, PROMPTLY RETURN THE PRINTER AND ALL ACCOMPANYING HARDWARE AND WRITTEN MATERIALS TO THE PLACE YOU OBTAINED THEM, AND YOUR MONEY WILL BE REFUNDED.

Definitions.

"Software" shall mean the digitally encoded, machine-readable data and program. The term "Software Product" includes the Software resident in the printer and its documentation. The Software Product is licensed (not sold) to you, and Printronix, Inc. either owns or licenses from other vendors who own, all copyright, trade secret, patent and other proprietary rights in the Software Product.

License.

1. Authorized Use. You agree to accept a non-exclusive license to use the Software resident in the printer solely for your own customary business or personal purposes.
2. Restrictions.
 - a. To protect the proprietary rights of Printronix, Inc., you agree to maintain the Software Product and other proprietary information concerning the typefaces in strict confidence.
 - b. You agree not to duplicate or copy the Software Product.
 - c. You shall not sublicense, sell, lease, or otherwise transfer all or any portion of the Software Product separate from the printer, without the prior written consent of Printronix, Inc.
 - d. You may not modify or prepare derivative works of the Software Product.
 - e. You may not transmit the Software Product over a network, by telephone, or electronically using any means; or reverse engineer, decompile or disassemble the Software.
 - f. You agree to keep confidential and use your best efforts to prevent and protect the contents of the Software Product from unauthorized disclosure or use.
3. Transfer. You may transfer the Software Product with the printer, but only if the recipient agrees to accept the terms and conditions of this Agreement. Your license is automatically terminated if you transfer the Software Product and printer.

Limited Software Product Warranty

Printronix, Inc. warrants that for ninety (90) days after delivery, the Software will perform in accordance with specifications published by Printronix, Inc. Printronix, Inc. does not warrant that the Software is free from all bugs, errors and omissions.

Remedy

Your exclusive remedy and the sole liability of Printronix, Inc. in connection with the Software is replacement of defective software with a copy of the same version and revision level.

Disclaimer of Warranties and Limitation of Remedies

1. THE PARTIES AGREE THAT ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE AND MERCHANTABILITY ARE EXCLUDED. Printronix, Inc. does not warrant that the functions contained in the Software will meet your requirements or that the operation of the Software will be uninterrupted or error free. Printronix, Inc. reserves the right to make changes and/or improvements in the Software without notice at any time.
2. IN NO EVENT WILL PRINTRONIX, INC. BE LIABLE FOR LOST PROFITS, LOST DATA, BUSINESS INTERRUPTIONS, OR ANY OTHER DIRECT, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OF OR INABILITY TO USE THIS PRODUCT, EVEN IF PRINTRONIX, INC. HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, OR ANY DAMAGES CAUSED BY THE ABUSE OR MANIPULATION OF THE SOFTWARE. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.
3. Printronix, Inc. will not be liable for any loss or damage caused by delay in furnishing a Software Product or any other performance under this Agreement.
4. Our entire liability and your exclusive remedies for our liability of any kind (including liability for negligence except liability for personal injury caused solely by our negligence) for the Software Product covered by this Agreement and all other performance or nonperformance by us under or related to this Agreement are limited to the remedies specified by this Agreement.
5. California law governs this Agreement.

Termination of License Agreement

This License shall continue until terminated. This license may be terminated by agreement between you and Printronix, Inc. or by Printronix, Inc. If you fail to comply with the terms of this License and such failure is not corrected within thirty (30) days after notice. When this License is terminated, you shall return to the place you obtained them, the printer and all copies of the Software and documentation.

U.S. Government Restricted Rights

Use, duplication or disclosure by the Government is subject to restrictions as set forth in the Rights in Technical Data and Computer Software clause at FAR 242.227-7013, subdivision ¹ (3) (ii) or subparagraph (c) (1) (ii), as appropriate. Further use, duplication or disclosure is subject to restrictions applicable to restricted rights software as set forth in FAR 52.227-19 (c) (2).

Acknowledgement of Terms and Conditions

YOU ACKNOWLEDGE THAT YOU HAVE READ THIS AGREEMENT, UNDERSTAND IT, AND AGREE TO BE BOUND BY ITS TERMS AND CONDITIONS. NEITHER PARTY SHALL BE BOUND BY ANY STATEMENT OR REPRESENTATION NOT CONTAINED IN THIS AGREEMENT. NO CHANGE IN THIS AGREEMENT IS EFFECTIVE UNLESS WRITTEN AND SIGNED BY PROPERLY AUTHORIZED REPRESENTATIVES OF EACH PARTY. BY USING THIS PRINTER, YOU AGREE TO ACCEPT THE TERMS AND CONDITIONS OF THIS AGREEMENT.

This document contains proprietary information protected by copyright. No part of this document may be reproduced, copied, translated, or incorporated in any other material in any form or by any means, whether manual, graphic, electronic, mechanical, or otherwise, without the prior written consent of Printronix.

Printronix makes no representations or warranties of any kind regarding this material, including, but not limited to, implied warranties of merchantability and fitness for a particular purpose. Printronix shall not be held responsible for errors contained herein or any omissions from this material or for any damages, whether direct or indirect, incidental or consequential, in connection with the furnishing, distribution, performance, or use of this material. The information in this manual is subject to change without notice.

Introduction

Product Introduction

Printronix® has been the global leader in industrial printing solutions for over 30 years, earning a reputation for designing and manufacturing leading edge products and delivering them to market with unsurpassed service and support.

The M4L is a comfortable, light-weight printer capable of working with any mobile receipt printing application where you need quick, simple receipts on demand. Our M4L is designed for a rough life, inside the IP54-rated environmental case to resist dust and water and with its rubber over-mold design prepared to take up to a five foot fall and keep printing. These small and light printers can be worn comfortably for a full shift, without interfering with the user's tasks. Use USB, Bluetooth, optional 802.11 b/g/n Wireless or serial to connect to a mobile computer or even a smart phone and produce clear easy-to-read receipts hour after hour

To print label formats, please refer to the instructions provided with your labeling software; if you need to write the custom programs, please refer to the ZPL/CPCL programming manual that can be found on the accessories CD-ROM or on PRINTRONIX website at <http://www.primtronix.com>.

Applications

- Portable point of sale
- Retail item marking, markdowns, shelf labeling & shelf talkers
- Labels for shipping & receiving
- Inventory control
- Cross-docking
- Pick, pack & apply operations
- Print pick tickets
- Logistics receipts

Printer Features

Standard Features

Your M4L offers the following standard features:

Standard Feature
Direct thermal printing
Black mark reflective sensor (center position , black mark in back side)
Gap transmissive sensor (Fixed, center of offset 2.75 mm to right from center) 203 Print Density
203 Print Density
Cover open sensor
Label Taken sensor
4 operation buttons (On/off, menu, info, and feed)
2 LEDs for printer status and battery status
USB 2.0 (full speed) interface
Class 2 Bluetooth 2.1 module
32 MB SDRAM memory
16 MB FLASH memory
Micro SD card reader for memory expansion up to SDHC 4G (max.)
DC 7.2V/5800 mAh Li-ion rechargeable battery
Real time clock
Powerful 32 bit 200 MHz RISC processor
Zebra® CPCL and Zebra® ZPL emulation languages support
Internal 8 alpha-numeric bitmap fonts
Internal Monotype Imaging® true type font engine with one CG Triumvirate Bold Condensed scalable font
Fonts and bar codes can be printed in any one of the four directions (0, 90,180, 270 degree)
Downloadable fonts from PC to printer memory
Downloadable firmware upgrades

Bar code, graphics/image printing		
Supported bar code		Supported image
1D bar code	2D bar code	BITMAP; BMP; PCX (Max. 256 color graphics)
Code 128 subsets A, B, C; Code 128UCC; EAN 128; Interleave 2 of 5; Code 39; Code 93; EAN-13; EAN-8; Codabar; POSTNET; UPC-A; UPC-E; EAN and UPC 2(5) digits; MSI; PLESSEY; China Post, ITF-14; EAN14; Code 11; TELPEN; PLANET, Code 49; Deutsche Post Identcode; Deutsche Post Leitcode; LOGMARS	CODABLOCK F mode; DataMatrix, Maxicode, PDF-417; Aztec; MicroPDF417; QR code; RSS Barcode (GS1 Databar)

Density 3	26	780										
Density 8	21	650										
Charging capability	<u>Internal charging capability (battery-in)</u> Single Unit Charger (optional) <u>External charging capability (battery-out)</u> Charging stations (4 bay or single bay) (optional)											

Print Specifications

Print Specifications	
Print head resolution (dots per inch/mm)	203 dots/inch (8 dots/mm)
Printing method	Direct thermal
Dot size (width x length)	0.125 x 0.125 mm (1 mm = 8 dots)
Print speed (inches per second)	Max. 4 ips (100 mm/sec)
	2,3 ips for Peel-Off mode
Max. print width	4.09" (104 mm)
Max. print length	90" (2286 mm)
Printout bias	Vertical: 1 mm max. Horizontal: 1 mm max.

Media Specifications

Media Specifications	
Media roll capacity	Max. 2.65" (67.3 mm) OD
Media core diameter	0.5 ~ 1" (12.7 mm ~ 25.4 mm) ID core
Media type	Continuous, die-cut, gap/black mark, External fan- fold, receipt
Media wound type	Outside wound
Media width	2" ~ 4.41" (50.8 mm ~ 112 mm)
Media thickness	0.0020"~0.0065" (0.055 mm ~ 0.165 mm)
Label length	0.500"~90" (12.7 mm ~ 2286 mm)
Label length (peeler mode)	1" ~ 6" (25.4 ~ 152.4 mm)
External fan-fold media	Stack height: 2.75" (70 mm)
	Page length: 6" ~ 12" (152 mm ~ 305 mm)
Black mark	Min. 0.3150" (8 mm) (W) x 0.0785" (2 mm) (H)
Gap height	Min. 0.0785" (2 mm)

Power	Off	Printer power is turned off
	Green (solid)	<ul style="list-style-type: none"> - Printer power is turned on - Battery is full charged
	Green (blinking)	Low battery
	Amber (solid)	Battery is charging
LCD	Indication	
	Printer has been connected with cable	
	Bluetooth devices have been paired	
	Wi-Fi device has been connected	
	Battery capacity %	

Note: Refer to Section 6 for additional LCD Display details

3

Printer Setup

Installing the Belt Clip and Battery

Insert the Belt Clip first

Insert the left side to install the battery on the underside of the printer, and then push the right side of the battery down until the clasp locks

Battery Safety Warning:

DO NOT throw the battery in fire. **DO NOT** short circuit the contacts.
DO NOT disassemble the battery. **DO NOT** throw the battery in municipal waste

CAUTION: Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions

Charging the Battery

It takes 5 hours to fully charge the battery before first time usage. The lifetime of the battery is 300 charge/discharge cycles.

After installing the battery into the printer open the interface cover and plug the Charger power cord into the printer power jack

Plug the Charger into a compatible power outlet

Note: Switch OFF printer power prior to plugging the power cord into the printer power jack
Do not remove the battery from the printer while it is charging or you will need to re-plug the charger into the power outlet

When the battery is charging, the color of the Power LED Indicator is solid amber.
The battery is fully charged when the Power LED Indicator turns from amber to green

Loading the Media

Open the printer media cover by pressing down on the media cover release latch.

Pull the media holders apart far enough to fit the width of the label roll you are installing

Place the roll, printing side face-out, between the media holders and insert hub into the core. Pull out enough paper above the printhead

Press down on both sides of the media cover to ensure it is closed correctly.

Note: Calibrate the gap/black mark sensor when changing media using the Configuration Utility – Printer Function – Calibrate Sensor

Loading Media in Peel-Off Mode

Load Media as defined in **Loading the Media** section on previous page

Remove 1 ~ 2 die cut labels from the liner

Press down on both sides of the media cover to ensure it is closed correctly.

Note: Calibrate the gap/black mark sensor when changing media using the Configuration Utility – Printer Function – Calibrate Sensor

Route the liner under the label peel cover as shown

Pull the liner tightly

Push the label peel cover toward the front of the printer until it covers the plate roller

Press down on the label peel cover to lock it in place

Note: Calibrate the gap/black mark sensor when changing media using the Configuration Utility – Printer Function – Calibrate Sensor

Loading Fan-fold/External Media

Open the printer media cover by pressing down on the media cover release latch.

Pull the media holders apart far enough to fit the width of the Fan-fold media you are installing

Push down each media holder lock lever to secure the media holders in place

Route the media, printing side out, through the bottom external label slot

Press down on both sides of the media cover to make sure it is closed correctly

Note: Calibrate the gap/black mark sensor when changing media using the Configuration Utility – Printer Function – Calibrate Sensor

Connecting the Printer

The printer must establish communication with a host terminal which sends the data to be printed. There are three ways to connect the M4L series:

- By an USB cable between the printer and its host terminal
- By a Bluetooth short-range radio if Bluetooth is installed and enabled.
- By a Wireless LAN per 802.11 b/g/n (Option)

Cable Communications

Open the interface cover and connect the printer to the computer/smart phone (host terminal) with USB cable (USB to USB or USB to RS-232)

Wireless Communication with Bluetooth

Power on the printer

Open the Bluetooth device for host terminal to scan for printer's Bluetooth device.

Connect the Bluetooth devices. The Bluetooth icon will display in the LCD panel if devices have been paired.

Printer Bluetooth default	
Address	You can find this info from configuration (self-test) page, Please refer to Power On Utilities section for how to print the self-test.
Name	BT-SPP
PIN	0000

Note: Please refer to **Setting Bluetooth by Configuration Utility** in section 5 to change the name and PIN by Configuration Utility or refer to **Bluetooth** in section 6 to change the name and PIN directly

Wireless Communication with WiFi

You should set the WLAN settings via the cable when first setting up the printer. Please refer to **Setting WiFi by Configuration Utility** in section 5 to set up the WiFi module. Please refer to **Wireless LAN** in section 6 to set up the WLAN settings

4

Power-On Utilities

There are three power-on utilities to set up and test printer hardware. These utilities are activated by pressing the FEED key then turning on the printer power key simultaneously and releasing the FEED key when the desired utility function displays on the LCD panel to initiate that utility.

Power-On Utilities

Use the following steps to initiate different power-on utilities:

Turn off the printer power using the power key 

Press and hold the FEED key  then while still pressing the FEED key press and hold down the power key 

Release the power key  when the “Error” LED turns red.

Note: At this time continue to press down on the FEED key 

After the printer beeps twice, wait until the desired utility displays on the LCD and then release the FEED key  to initiate that utility. The order that the utilities appear on the LCD are described below:

Power On Utilities	The LCD will change as follows:		
LCD	<div>Calibrate..... (5 dots)</div>	<div>Self Test..... (5 dots)</div>	<div>Initialize..... (5 dots)</div>
Release Feed key  for different functions	Media sensor calibration	Media sensor calibration, self-test and dump mode	Printer initialization

Media Sensor Calibration

Use the following steps to calibrate the media sensor:

Turn off the printer using the Power key 

Press and hold down the Feed key  then, while still holding down the Feed key, press and hold down the Power key 

Release the Power key  when the Error LED turns red continuing to hold down the Feed key 

When the printer beeps twice release the Feed key . The LCD will display "Calibrating.....".

The printer will move media, calibrate the gap/black mark sensor sensitivity and then stop with "Ready" displayed on the LCD.

Note: If the Feed key is held down after the printer beeps twice, with "Self Test" displayed, it will perform a Calibrate followed by a Self Test where it prints a Configuration Page and then ends in Dump mode.

Self Test and Dump Mode

Use the following steps to perform Self Test:

Turn off the printer using the Power key 

Press and hold down the Feed key  then, while still holding down the Feed key, press and hold down the Power key 

Release the Power key  when the Error LED turns red continuing to hold down the Feed key 

When the printer beeps twice wait until "Self Test" displays on the LCD then release the Feed key 

The printer will calibrate the sensor, print a Configuration Page of its internal settings and then enter Dump mode

Note: To exit Dump mode and return the printer back to normal print mode, turn off/on the printer power or press the Feed key. The LCD will display "Ready".

Printer Initialization

Printer initialization is used to clear DRAM and restore printer settings to defaults.

Use the following steps to perform printer initialization:

Turn off the printer using the Power key 

Press and hold down the Feed key  then, while still holding down the Feed key, press and hold down the Power key 

Release the Power key  when the Error LED turns red continuing to hold down the Feed key 

When the printer beeps twice wait until "Initialize" displays on the LCD then release the Feed key 

The LCD will display "Initializing....." followed by "Ready".

The printer will restore printer settings to defaults (see **Printer Defaults**)

Self Test

Printer will print the Configuration Page after media sensor calibration. Self-test printout can be used to verify printer configurations and available memory space. The printhead test pattern can verify if any printhead heater elements (dots) are damaged.

Note: The Self-test printout requires 4" paper/label width.

← Hex decimal data related to left column of ASCII data

Note:

Dump mode requires 4" paper/label width.

Exit Dump mode by turning off / on the power or by pressing the FEED key. The LCD will show "Ready" for normal printing operation.

Printer Defaults

Printer configuration will be restored to defaults as below after initialization.

Parameter	Default setting
Speed	50.8 mm/sec (2 ips)
Density	8
Media Width	4" (101.5 mm)
Media Height	4" (101.5 mm)
Sensor Type	Gap sensor
Print Direction	0
Reference Point	0,0 (upper left corner)
Gap Offset	0
Post-Print Action	Tear mode
Serial Port Settings	9600 bps, none parity, 8 data bits, 1 stop bit
Code Page	850
Country Code	001
Clear Flash Memory	No

Note: When printer initialization is done, calibrate the gap or black mark sensor before printing or attempting any Self tests.

5

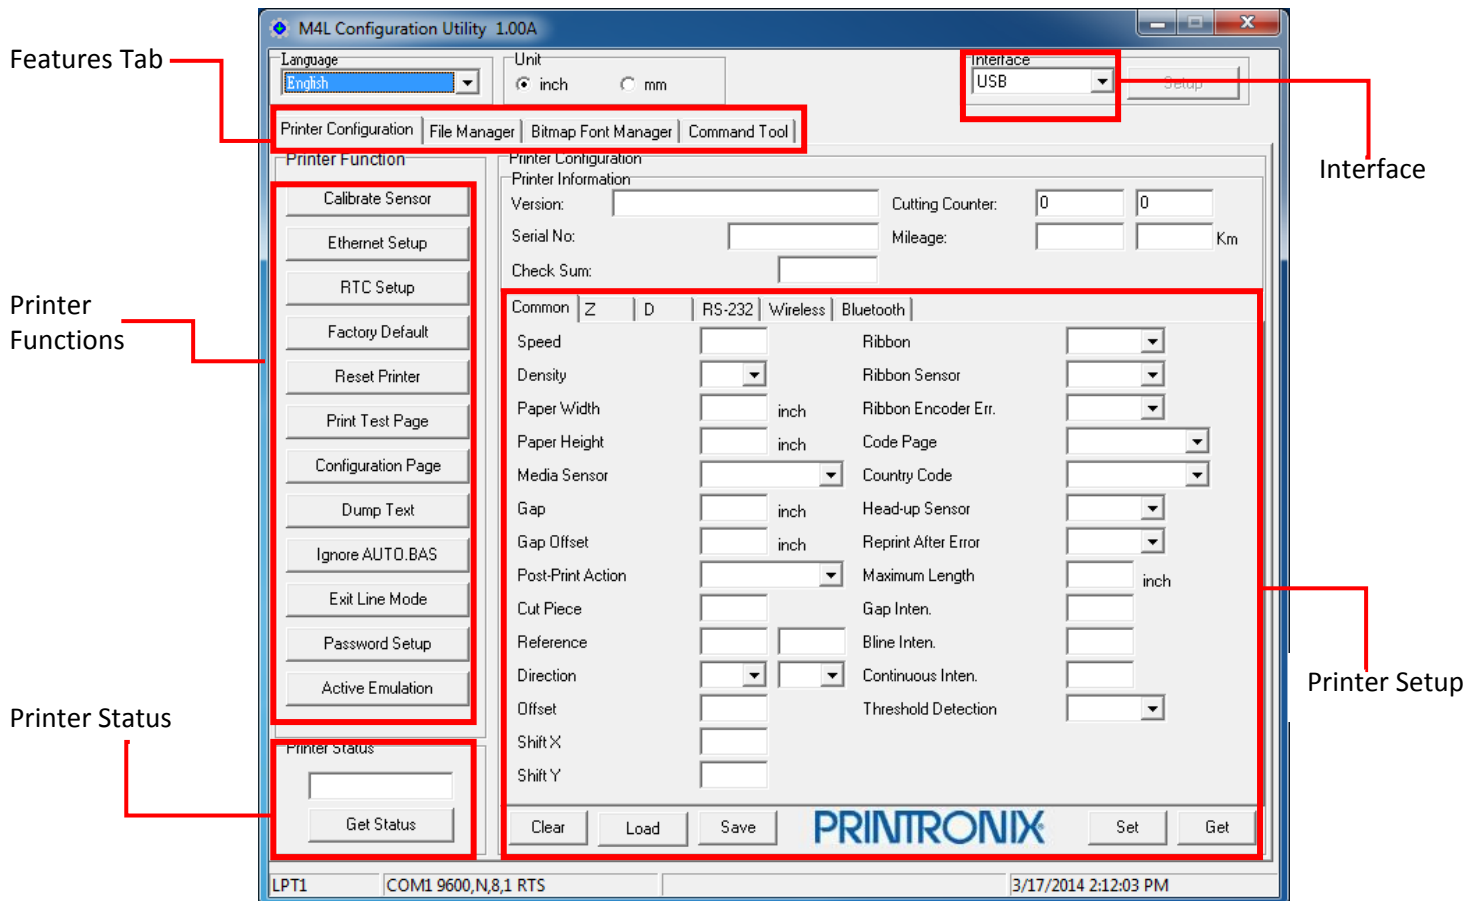

Configuration Utility

PRINTRONIX's Configuration Utility is an integrated tool incorporating features that enable you to explore a printer's settings/status; change a printer's settings; download graphics, fonts and firmware; create a printer bitmap font; and send additional commands to a printer. With the aid of this powerful tool, you can review printer status and setting in an instant, which makes it much easier to troubleshoot problems and other issues.

Start the Configuration Utility

Double click on the Configuration Utility icon  to start the software.

There are four features (Printer Configuration, File Manager, Bitmap Font Manager, Command Tool) included in the Configuration Utility

Connect the printer and computer with a USB cable.

Note: The printer connects with the computer via USB to USB cable or USB to RS-232 cable (option).

Select the printer interface connected with bar code printer

USB to USB cable	USB to RS-232 cable
<div>Interface USB</div> <div>Setup</div> <p>The default interface setting is USB interface. If USB interface is connected with printer, no other settings need to be changed in the interface field.</p>	<div>Interface COM</div> <div>Setup</div> <div> USB COM LPT ETHERNET </div>

Click the “Printer Function” button to setup.

The detail functions in the Printer Function Group are listed as below.

Printer Function		Function	Description
Calibrate Sensor		Calibrate Sensor	Calibrate the sensor specified in the Printer Setup group media sensor field
Ethernet Setup		Ethernet Setup	Setup the IP address, subnet mask, gateway for the on board Ethernet
RTC Setup		RTC Setup	Synchronize printer Real Time Clock with PC
Factory Default		Factory Default	Initialize the printer and restore the settings to factory default.
Reset Printer		Reset Printer	Reboot printer
Print Test Page		Print Test Page	Print a test page
Configuration Page		Configuration Page	Print printer configuration
Dump Text		Dump Text	To activate the printer dump mode.
Ignore AUTO.BAS		Ignore AUTO.BAS	Ignore the downloaded AUTO.BAS program
Exit Line Mode		Exit Line Mode	Exit line mode.
Password Setup		Password Setup	Set the password to protect the settings
Active Emulation		Active Emulation	Select ZPL/EPL/TSPL or CPCL emulation

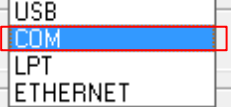

Setting Bluetooth by Configuration Utility

Connect the printer and computer with a USB cable.

Note: The printer connects with the computer via USB to USB cable or USB to RS-232 cable (option).

Turn the printer power on using the Power key 

Open Configuration Utility and set interface (default setting is USB)

USB to USB cable	USB to RS-232 cable
<div>Interface USB  </div> <p>The default interface setting is USB interface. If USB interface is connected with printer, no other settings need to be changed in the interface field.</p>	<div>Interface COM  </div> <div><ul style="list-style-type: none">USBCOMLPTETHERNET</div>

Select “Wireless” tab and click on “Built-in wireless module” item.

Enter the new BT Local Name or BT PIN Code in the editor.

Press “Set” button to set the new BT name or BT PIN code of the printer.

Press “Get” button to get back the settings. Make sure the Bluetooth module settings are set properly

Setting WiFi by Configuration Utility

Connect the printer and computer with a USB cable.

Note: The printer connects with the computer via USB to USB cable or USB to RS-232 cable (option).

Turn the printer power on using the Power key 

Open Configuration Utility and set interface (default setting is USB)

USB to USB cable	USB to RS-232 cable
<div>Interface USB  </div> <p>The default interface setting is USB interface. If USB interface is connected with printer, no other settings need to be changed in the interface field.</p>	<div>Interface COM  </div> <div><ul style="list-style-type: none">USBCOMLPTETHERNET</div>

Select “Wireless” tab and click on “Built-in wireless module” item.

Enter the new WLAN settings in the editor.

Press “Set” button to set the new settings to the printer.

The Wi-Fi icon will be shown in the LCD panel if the device has been connected.

Print out the self-test page to confirm if it's connected with the correct settings.

Remove the cable to print data to test

LCD Menu Function

The M4L has an LCD panel to further enhance its capabilities to meet the demands of a wide range of printing solutions. This includes an LCD control panel, 4 keys and 2 LED status indicators.

Using the LCD to Set the Printer

Press the “M” key to display the function menu screen as shown below

Use the 4 keys at the sides of the LCD to scroll, select, enter or return from the menu. The icon functions are listed below.

Icon	Function
	Display printer information
	Enter setting menu
	Power switch
	Scroll up
	Scroll down
	Return to previous menu
	Enter to next menu
	Enter setting mode
	Exit setting mode
	Save the selected settings and return to previous menu
	Select
	Alter to OFF
	Alter to ON

Example:

To change the Speed setting, follow the steps below:

Press “M” key to enter the Main menu. Press  key to enter the “Setup” item.

Press  button to enter the “Print Setup” item. Select the “TSPL2” item. Enter the “Speed” setting mode.

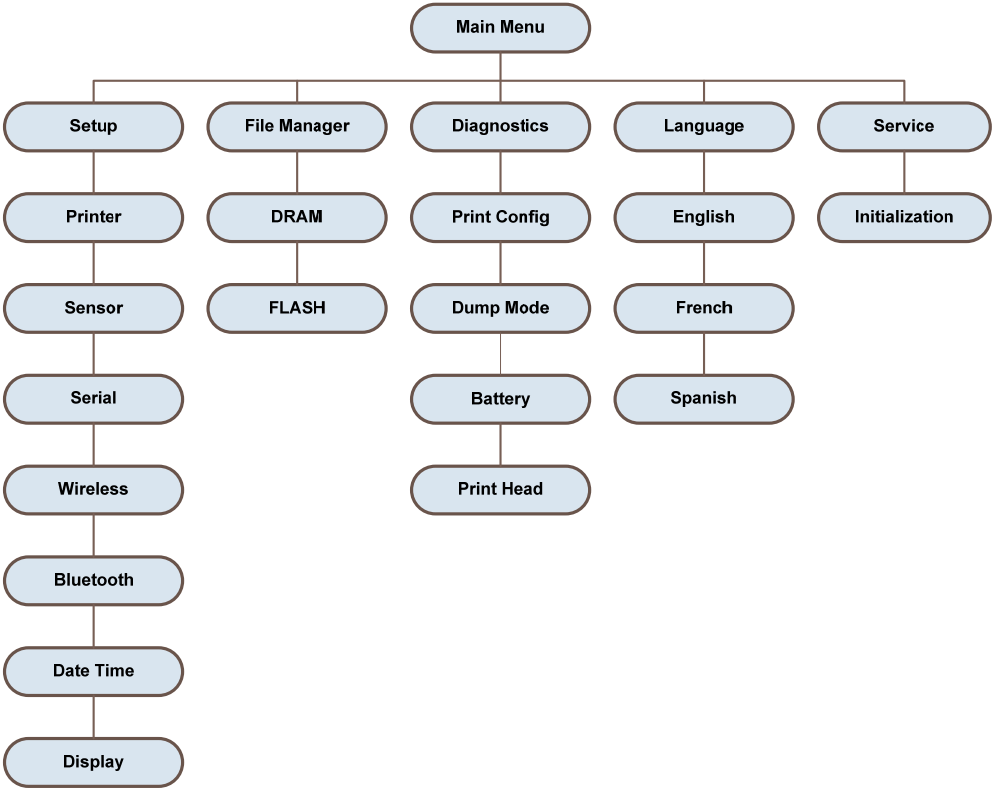

At this status, you can scroll up or scroll down to select the value of print speed. Then press the  key to save the selected value into the printer. Press  key to go back to “Ready mode”.

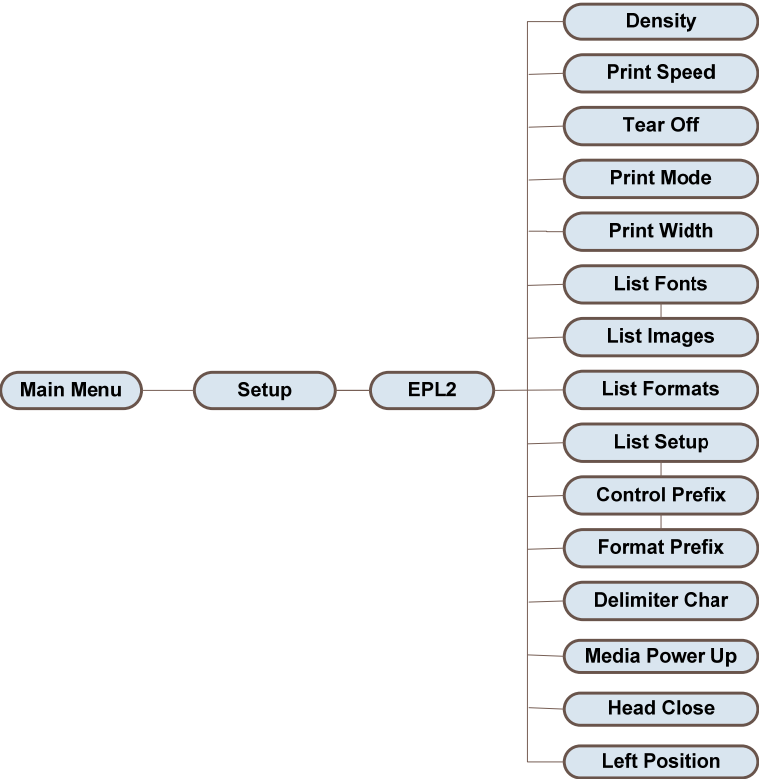

Using the LCD to Set the Printer

There are 5 categories for the main menu. You can easily set the settings of the printer without connecting it to a computer. Please refer to the following sections for more details.

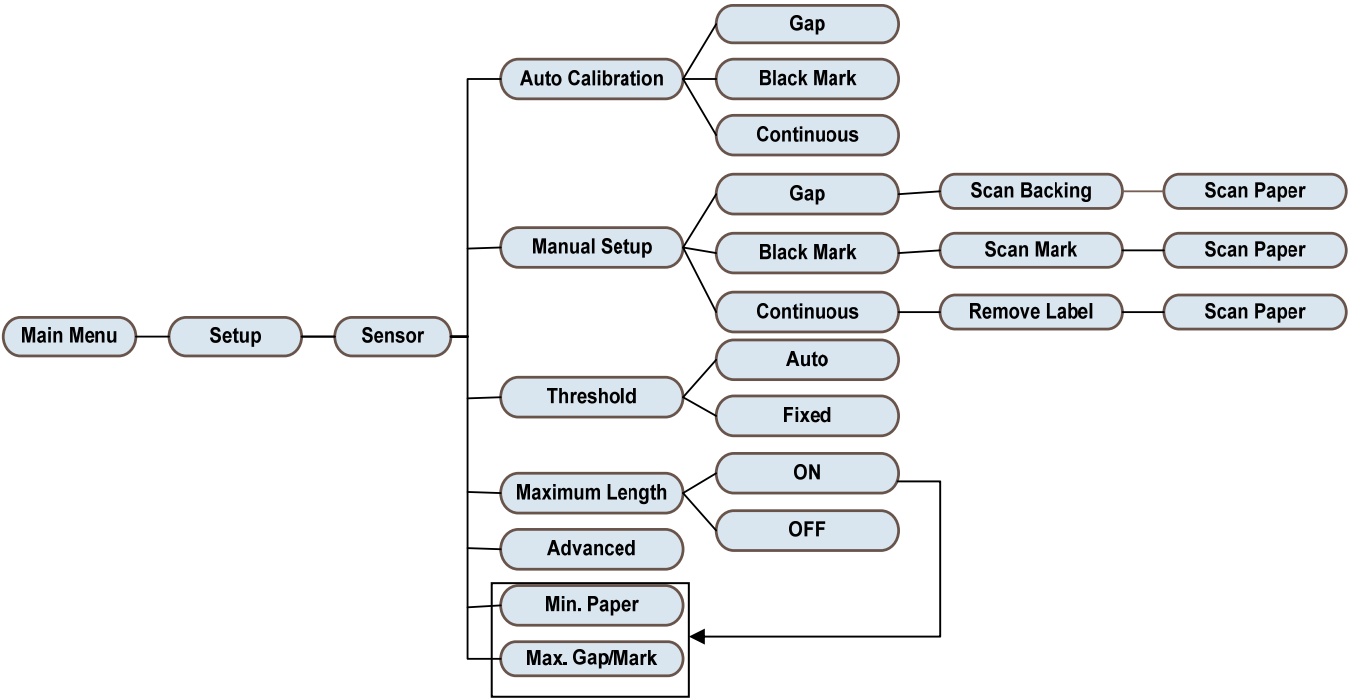

Printer Setup for EPL2

Item	Description	Default										
Density	Use this item to setup printing darkness. The available setting is from 0 to 30, and the step is 1. You may need to adjust your density based on selected media.	16										
Print Speed	Use this item to setup print speed. The each increase or decrease is 1 ips. Available setting is from 1 to 6.	2										
Tear Off	This item is used to fine tune media stop location. Available setting value is from "+" to "-" or "0" to "9".	0										
Print mode	<div>This item is used to set the print mode. There are 2 modes as below,</div> <table><tr><th>Printer Mode</th><th>Description</th></tr><tr><td>Tear Off Mode</td><td>Next label top of form is aligned to the print head burn line location</td></tr><tr><td>Peeler Mode</td><td>Enable the Label Peel Off mode</td></tr></table>	Printer Mode	Description	Tear Off Mode	Next label top of form is aligned to the print head burn line location	Peeler Mode	Enable the Label Peel Off mode	Tear Off				
Printer Mode	Description											
Tear Off Mode	Next label top of form is aligned to the print head burn line location											
Peeler Mode	Enable the Label Peel Off mode											
Print Width	This item is used to set print width. The available value is from "0" to "9".	812										
List Fonts	This feature is used to print current printer available fonts list to the label. The fonts stored in the printer's DRAM, Flash or optional memory card.	N/A										
List Images	This feature is used to print current printer available images list to the label. The images stored in the printer's DRAM, Flash or optional memory card.	N/A										
List Formats	This feature is used to print current printer available formats list to the label. The formats stored in the printer's DRAM, Flash or optional memory card.	N/A										
List Setup	This feature is used to print current printer configuration to the label.	N/A										
Control Prefix	This feature is used to set control prefix character.	N/A										
Format Prefix	This feature is used to set format prefix character.	N/A										
Delimiter Char	This feature is used to set delimiter character.	N/A										
Media Power Up	<div>This option is used to set the action of the media when you turn on the printer.</div> <table><tr><th>Selections</th><th>Description</th></tr><tr><td>Feed</td><td>Printer will advance one label</td></tr><tr><td>Calibration</td><td>Printer will calibrate the sensor levels, determine length and feed label</td></tr><tr><td>Length</td><td>Printer will determine length and feed label</td></tr><tr><td>No Motion</td><td>Printer will not move media</td></tr></table>	Selections	Description	Feed	Printer will advance one label	Calibration	Printer will calibrate the sensor levels, determine length and feed label	Length	Printer will determine length and feed label	No Motion	Printer will not move media	No Motion
Selections	Description											
Feed	Printer will advance one label											
Calibration	Printer will calibrate the sensor levels, determine length and feed label											
Length	Printer will determine length and feed label											
No Motion	Printer will not move media											
Head Close	<div>This option is used to set the action of the media when you close the printhead</div> <table><tr><th>Selections</th><th>Description</th></tr><tr><td>Feed</td><td>Printer will advance one label</td></tr><tr><td>Calibration</td><td>Printer will calibrate the sensor levels, determine length and feed label</td></tr><tr><td>Length</td><td>Printer will determine length and feed label</td></tr><tr><td>No Motion</td><td>Printer will not move media</td></tr></table>	Selections	Description	Feed	Printer will advance one label	Calibration	Printer will calibrate the sensor levels, determine length and feed label	Length	Printer will determine length and feed label	No Motion	Printer will not move media	No Motion
Selections	Description											
Feed	Printer will advance one label											
Calibration	Printer will calibrate the sensor levels, determine length and feed label											
Length	Printer will determine length and feed label											
No Motion	Printer will not move media											
Label Top	This option is used to adjust print position vertically on the label. The range is -120 to +120 dots.	0										
Left Position	This option is used to adjust print position horizontally on the label. The range is -9999 to +9999 dots.	0										

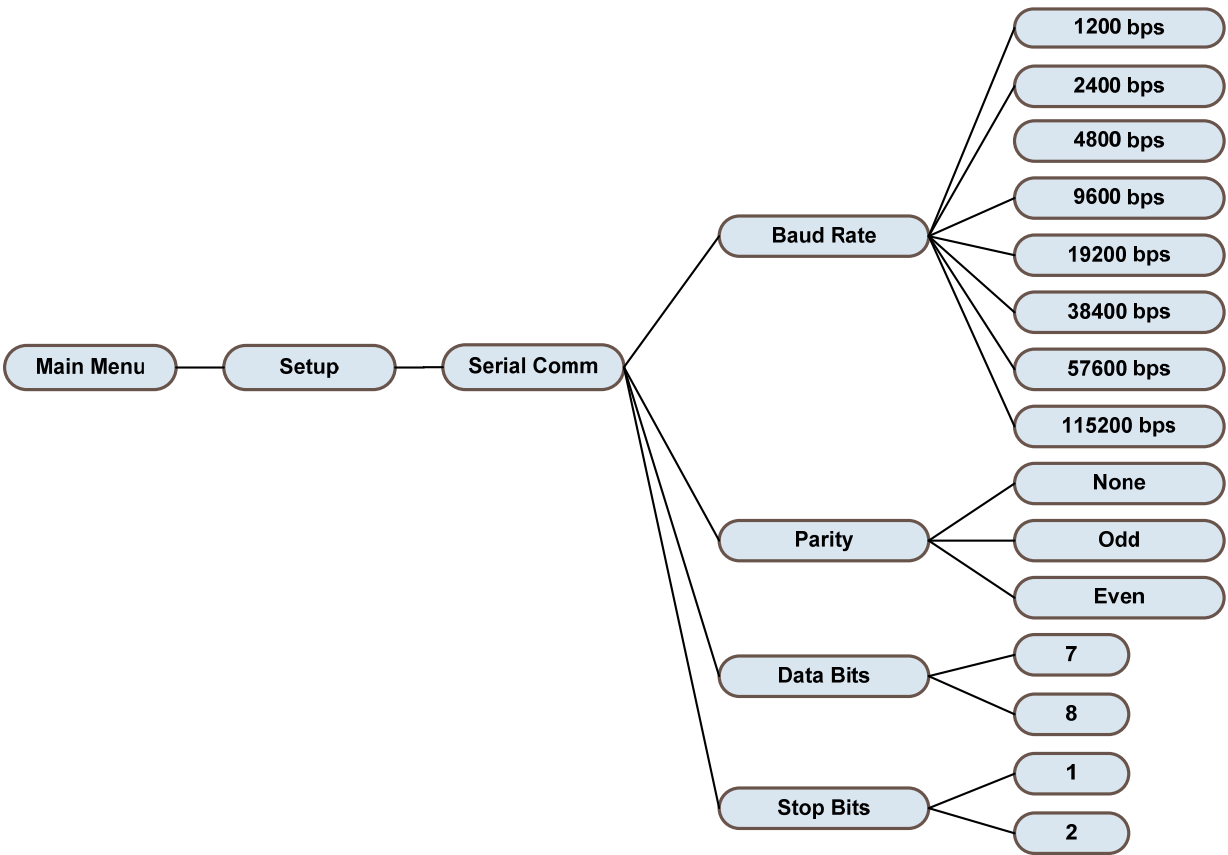

Note: If printing from enclosed software/driver, the software/driver will send out the commands, which will overwrite the settings set from the LCD panel

Sensor

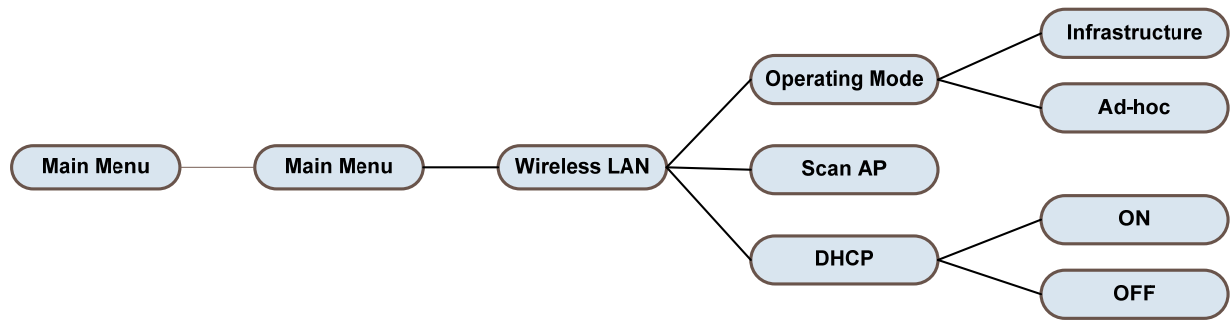

Item	Description	Default
Auto Calibration	This item is used to set the media sensor type and calibrate the selected sensor. Printer will feed 2 to 3 gap labels to calibrate the sensor sensitivity automatically.	N/A
Manual Setup	In case “Auto Calibration” cannot apply to the media, please use “Manual Setup” function to calibrate the sensor manually. Please Note: You can open the media cover to move the paper but have to close the media cover for each scan.	N/A
Threshold	This item is used to fix the calibrated sensor sensitivity.	Auto
Maximum Length	This item is used to set the max. Calibrate length.	152
Advanced	This item is used for pre-printed paper. If this advanced function is turned “ON” then you can setup the min. paper and max. gap/black mark size.	OFF

Serial Comm.

Item	Description	Default
Baud Rate	This item is used to set the RS-232 baud rate.	9600
Parity	This item is used to set the RS-232 parity.	None
Data Bits	This item is used to set the RS-232 Data Bits.	8
Stop Bit(s)	This item is used to set the RS-232 Stop Bits.	1

Wireless LAN

Item	Description	Default
Operating Mode	This item is used to set the operating mode of wireless local area networks to connect devices to the networks. Note: Infrastructure mode requires the use of an access point for this communication to take place. Ad hoc mode involves connecting a computer directly to another computer.	Infrastructure
Scan AP	This item is used to scan the access point device	N/A
DHCP	This item is used to ON or OFF the DHCP (Dynamic Host Configuration Protocol) network protocol.	ON

Bluetooth

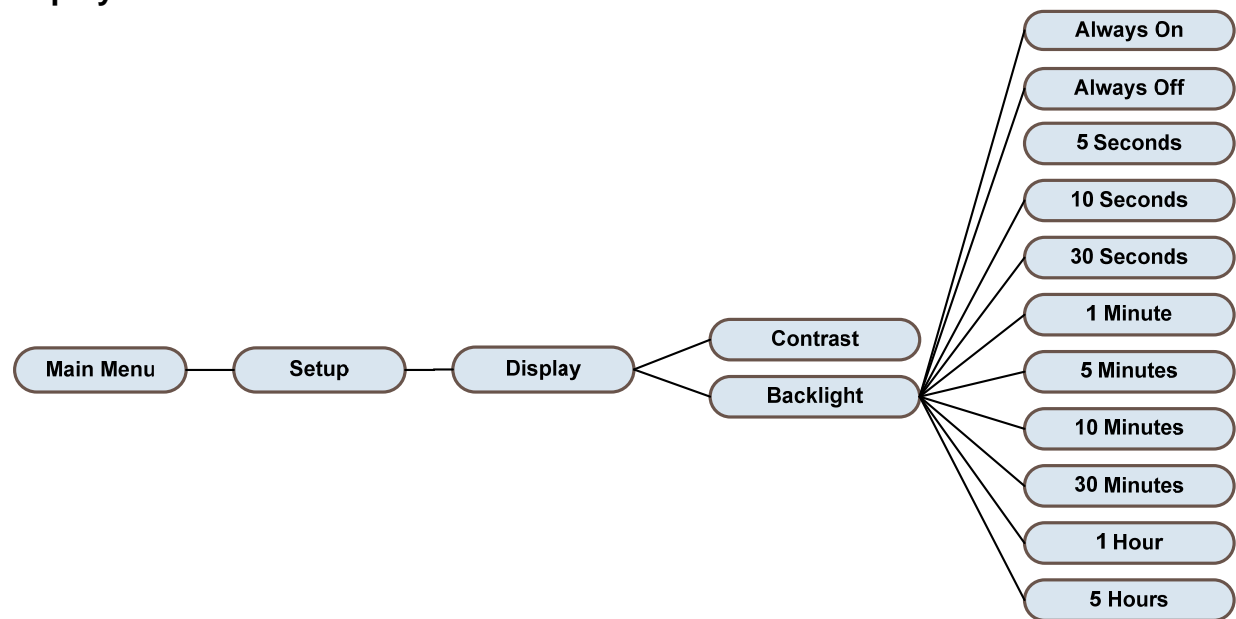

Item	Description	Default
Local Name	This item is used to set the local name for Bluetooth.	BT-SPP
PIN Code	This item is used to set the local PIN code for Bluetooth.	0

Date Time

Item	Description	Default
Date	This item is used to set the date. (ex: 2013-05-30)	N/A
Time	This item is used to set the time. (ex: 19:20:02)	N/A

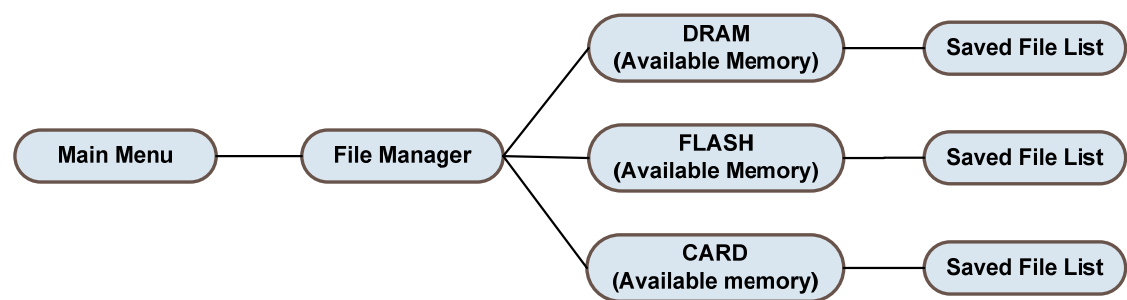

Display

Item	Description	Default
Contrast	This item is used to set the contrast for the display.	50
Backlight	This item is used to set the backlight time for the display.	10 Seconds

File Manager

This feature is used to check the printer available memory and file list.

Item	Description
DRAM	Use this menu to show available memory space and run (.BAS) the files saved in the printer DRAM memory.
FLASH	Use this menu to show available memory space and run (.BAS) the files saved in the printer Flash memory.
CARD	Use this menu to show available memory space and run (.BAS) the files saved in the printer MicroSD card memory.

Diagnostics

Print Config

This feature is used to print current printer configuration to the label. On the configuration printout, there is a print head test pattern, which is useful for checking if there is any dot damage on the printhead heater elements. Please refer to **Self Test** in Chapter 4 for more details.

Dump Mode

Captures the data from the communications port and prints out the data received by printer. In Dump mode, all characters will be printed in 2 columns. (Please refer to **Dump Mode** in Chapter 4) The left side characters are received from your system and right side data are the corresponding hexadecimal value of the characters. It allows users or engineers to verify and debug the program.

Note: Dump mode requires 4" paper/label width.

Battery

This feature is used to check the printer battery voltage

Printhead

This feature is used to check the printer temperature, resistance and bad dots for the printhead.

Display Languages

This option is used to setup languages on LCD display

Service

This feature is used to restore printer settings to defaults. Please refer to Printer Defaults in Chapter 4.

Note: When printer initialization is done, calibrate the gap or black mark sensor before printing or attempting any Self Tests.

7

Trouble Shooting

The following guide lists the most common problems that may be encountered when operating this bar code printer. If the printer still does not function after all suggested solutions have been invoked, please contact the Printronix Customer Support Center for assistance.

Problem	Possible Cause	Recovery Procedure
Power indicator does not illuminate	<ul style="list-style-type: none">* The battery is not properly installed.* The battery is out of power.* The battery is dead.	<ul style="list-style-type: none">* Reinstall the battery correctly.* Power the printer on.* Charge the battery.* Replace with a new battery.
Not Printing	<ul style="list-style-type: none">* Check if interface cable is well connected to the interface connector.* Check if wireless or Bluetooth device settings match between the host and printer.* The port specified in the Windows driver is not correct.	<ul style="list-style-type: none">* Reset the wireless device settings.* Select the correct printer port in the driver.
No print on the label	<ul style="list-style-type: none">* Labels are not loaded correctly.* Media may be installed wrong side out.* The wrong type paper/labels are installed.	<ul style="list-style-type: none">* Follow the instructions in loading the media.* Use direct thermal type paper/labels.
The printer status from the Configuration Utility or LCD shows "Head Open".	<ul style="list-style-type: none">* The printer media cover is open or is not closed properly.	<ul style="list-style-type: none">* Close the media cover correctly.
The printer status from the Configuration Utility or LCD shows "Out of Paper"..	<ul style="list-style-type: none">* The printer has run out of media.* The media is installed incorrectly.* Media sensor is not calibrated.	<ul style="list-style-type: none">* Install new media..* Follow the instructions for loading roll or fanfold media.* Calibrate the media sensor.
The printer status from the Configuration Utility or LCD shows "Paper Jam".	<ul style="list-style-type: none">* Media sensor is not set properly.* Make sure media size is set properly.* A label may be stuck inside the printer mechanism.	<ul style="list-style-type: none">* Calibrate the media sensor.* Set media size correctly.* Remove the stuck label from inside the printer mechanism.
The printer status from LCD shows "Strong light. Press FEED to print."	<ul style="list-style-type: none">* The Peel-off sensor can't work in strong lighted areas.	<ul style="list-style-type: none">* Move the printer to a proper place to print in peel-off mode.

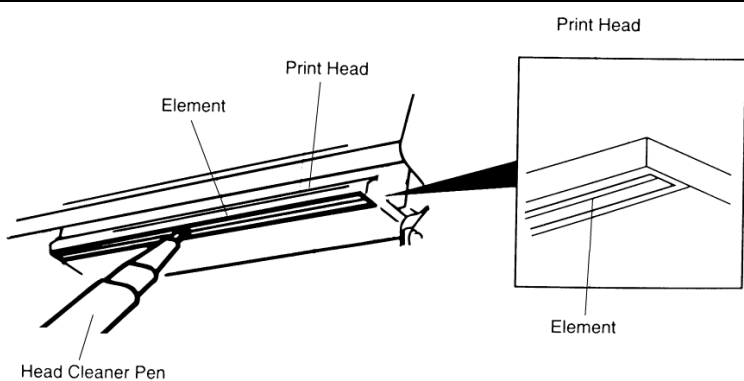

Problem	Possible Cause	Recovery Procedure
Can't downloading the file to memory (FLASH / DRAM/CARD)	* The selected memory space is full.	<ul style="list-style-type: none"> * Delete unused files in the memory. * The max. number of DRAM is 256 files. * The max. user addressable memory space of DRAM is 2048KB. * The max. number of FLASH files is 256 files. * The max. user addressable memory space of FLASH is 14336KB.
Poor Print Quality	<ul style="list-style-type: none"> * Media is loaded incorrectly * Dust or adhesive accumulation on the print-head. * Print density (darkness) is not set properly. * Print speed is not set properly. * Printhead element is damaged. 	<ul style="list-style-type: none"> * Reload media correctly. * Clean the print-head. * Clean the platen roller. * Adjust the print density (darkness) and print speed. * Run the printer self-test and check the print-head test pattern for dots missing in the pattern. * Change to a proper media roll.
Missing printing on the left or right side of label	* Too small of label width size is setup.	* Set the correct label width size.
Gray line on the blank label	<ul style="list-style-type: none"> * The print-head is dirty. * The platen roller is dirty. 	<ul style="list-style-type: none"> * Clean the print-head. * Clean the platen roller. Please refer to Maintenance Chapter
Irregular printing	* The printer is in Hex Dump mode. Dump mode is displayed on the LCD panel.	* Turn the printer off and on to exit dump mode.

8

Maintenance

This section discusses how to maintain your printer.

1. Use one of following materials to clean the printer.
 - Cotton swab or authorized Printronix Thermal Printhead Cleaning Pen (203502-002)
 - Lint-free cloth
 - Vacuum / Blower brush
 - 100% Ethanol or 99.7% Isopropyl Alcohol
2. The cleaning process is as follows:

Printer	Method	Interval
PrintHead	1. Always turn off the printer before cleaning the print head. 2. Allow the printhead to cool for a minimum of one minute. 3. Use a cotton swab or thermal printhead cleaning pen and 100% Ethanol or 99.7% Isopropyl Alcohol to clean the print head surface.	Clean the printhead prior to installing a new label roll.
		
Platen Roller	1. Turn the power off. 2. Rotate the platen roller and wipe it thoroughly with 100% ethanol alcohol or 99.7% isopropyl al a lint-free cloth.	Clean the platen roller when changing a new label roll
Tear/Peel Bar	Use a lint-free cloth with 100% ethanol alcohol to wipe the Tear/Peel bar.	Clean as needed
Sensor	Use compressed air or vacuum	Clean monthly
Exterior	Wipe it with a damp cloth	Clean as needed
Interior	Brush or vacuum	Clean as needed

Contact Information

Contact Information

Printronix Customer Support Center

IMPORTANT Please have the following information available prior to calling the Printronix Customer Support Center:

- Model number
- Serial number (located on the back of the printer)
- Installed options (i.e., interface and host type if applicable to the problem)
- Configuration printout (Press CONFIG on the control panel, then press ENTER)
- Network test page if Ethernet is enabled.
- Is the problem with a new install or an existing printer?
- Description of the problem (be specific)
- Good and bad samples that clearly show the problem (faxing or emailing of these samples may be required)

Communication Statements

FEDERAL COMMUNICATIONS COMMISSION (FCC) STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/ TV technician for help.

CAUTION:

Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

This device may cause harmful interference, and

This device must accept any interference received, including interference that may cause undesired operation.

RF exposure warning (WiFi)

This equipment must be installed and operated in accordance with provided instructions and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be providing with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance.

SAR Value: 0.663 W/kg

RF exposure warning (For Bluetooth)

The equipment complies with FCC RF exposure limits set forth for an uncontrolled environment. The equipment must not be co-located or operating in conjunction with any other antenna or transmitter.

Battery safety warning:

- DO NOT throw the battery in fire.
- DO NOT short circuit the contacts.
- DO NOT disassemble the battery.
- DO NOT throw the battery in municipal waste. Contact your local waste agency for the correct disposal procedure

CAUTION: Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions

The symbol of the crossed out wheeled bin indicates that the battery should not be placed in municipal waste.

CE Notice (European Union)

Marking by the CE symbol indicates compliance to the EMC directive and Low Voltage Directive of the European Union. Such marking is indicative that this system meets the following technical standards:

- EN 55022 "Limits and Methods of Measurement of Radio Interference Characteristics of Information Technology Equipment."
- EN 55024 "Electromagnetic Immunity Requirements for Information Technology Equipment"
- EN 60950 "Safety of Information Technology Equipment"
- EN 300328, EN 301489 "Electromagnetic Compatibility and Radio spectrum Matters"

Konformitätserklärung:

FCC Klasse B entspricht EMVG Klasse B

Für alle in Deutschland vertriebenen EN 55022 Klasse B Geräte:

Zulassungsbescheinigung laut dem Deutschen Gesetz über die elektromagnetische Verträglichkeit von Geräten (EMVG) vom 18. September 1998 (bzw. der EMC EG Richtlinie 89/336):

Dieses Gerät ist berechtigt in Übereinstimmung mit dem Deutschen EMVG das EG-Konformitätszeichen - CE - zu führen. Verantwortlich für die Konformitätserklärung nach Paragraph 5 des EMVG ist die:

Printronix Deutschland GmbH

Goethering 56

D-63067 Offenbach

Deutschland

Informationen in Hinsicht EMVG Paragraph 4 Abs. (1) 4:

Das Gerät erfüllt die Schutzanforderungen nach EN 55024 und EN 55022 Klasse B.

EN 55022 Klasse B Geräte müssen mit folgendem Warnhinweis versehen werden: "Warnung: dies ist eine Einrichtung der Klasse B. Diese Einrichtung kann im Wohnbereich Funkstörungen verursachen. In diesem Fall kann vom Betreiber verlangt werden, angemessene Maßnahmen durchzuführen und dafür aufzukommen."

EN 55024 Hinweis:

Wird dieses Gerät in einer industriellen Umgebung betrieben (wie in EN 55024 festgelegt), dann kann es dabei eventuell gestört werden. In solch einem Fall ist der Abstand bzw. die Abschirmung zu der industriellen Störquelle zu vergrößern.

Anmerkung:

Um die Einhaltung des EMVG sicherzustellen sind die Geräte, wie in den Printronix Handbüchern angegeben, zu installieren und zu betreiben.

Konformitätsklassen:

CE: EN 55022/24, IEC 61000-3-3, IEC 61000-3-2, EN 300328, EN 301489

EN 60950-1 durchgeführt von TÜV SÜD

Wichtige Sicherheits-Hinweise

1. Bitte lesen Sie die Hinweis sorgfältig durch.
2. Heben Sie diese Anleitung für den späteren Gebrauch auf.
3. Vor jedem Reinigen ist das Gerät vom Stromnetz zu trennen. Verwenden Sie keine Flüssig- oder Aerosolreiniger. Am besten eignet sich ein angefeuchtetes Tuch zur Reinigung.
4. Die Netzspannungs-Steckdose soll nahe dem Gerät angebracht und leicht zugänglich sein.
5. Das Gerät ist vor Feuchtigkeit zu schützen.
6. Bei der Aufstellung des Gerätes ist auf sicheren Stand zu achten. Ein Kippen oder Fallen könnte Beschädigungen hervorrufen.
7. Beachten Sie beim Anschluss ans Stromnetz die Anschlusswerte.
8. Dieses Gerät kann bis zu einer Außentemperatur von maximal 40-°C betrieben werden.

Batterie-Sicherheitshinweis:

Batterie nicht in offenes Feuer werfen.

Batterie nicht kurzschließen.

Batterie nicht zerlegen.

Batterie nicht über den Hausmüll entsorgen.

Auf fachgerechte Entsorgung achten (Kennzeichnung durch durchgestrichene Mülltonne).

Achtung!

Explosionsgefahr bei unsachgemäßem Austausch der Batterie. Ersatz nur durch Original- oder vom Hersteller empfohlenen Typ. Entsorgung gebrauchter Batterien nach Angaben des Herstellers durchführen.

Software License Agreement

Your printer contains, among other software, Printronix operating software including, but not limited to the Embedded Configurable Operating System (the “eCos Software”) as embedded software. The terms of this Agreement apply only to the eCos Software, and all other embedded software supplied with the printer. You accept the terms of this Agreement by your initial use of your printer.

eCos License

This file is part of eCos, the Embedded Configurable Operating System.

Copyright (C) 1998, 1999, 2000, 2001, 2002 Red Hat, Inc.

eCos is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 or (at your option) any later version.

You should have received a copy of the GNU General Public License along with eCos; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA.

eCos is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

As a special exception, if other files instantiate templates or use macros or inline functions from this file, or you compile this file and link it with other works to produce a work based on this file, this file does not by itself cause the resulting work to be covered by the GNU General Public License. However the source code for this file must still be made available in accordance with section (3) of the GNU General Public License.

This exception does not invalidate any other reasons why a work based on this file might be covered by the GNU General Public License.

Alternative licenses for eCos may be arranged by contacting Red Hat, Inc. at <http://sources.redhat.com/ecos/ecos-license/>

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputation.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution, and modification follow.

GNU GENERAL PUBLIC LICENSE

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION, AND MODIFICATION

This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:
 - a. You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
 - b. You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
 - c. If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:
 - a. Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
 - b. Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
 - c. Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.
5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.
6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.
7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING,

REPAIR OR CORRECTION

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS
