Gentlemen:

The enclosed documents constitute a formal submittal and request for a Class II Permissive Change/Reassessment pursuant to Part 90 of FCC Rules (CFR 47) and Industry Canada RSS-119 regarding Public Mobile Service. The permissive change/reassessment is being requested for GE MDS LLC model MDS1710D, FCCID: E5M-DS1710, IC: 3738A-MDS1710, to add 6.25KHz channel bandwidth operation. The MDS1710D has been tested and found to comply with FCC Part 90/RSS-119 limits for a transmitter operating in the 150-174 MHz band. This will be a new model to an existing family certification for IC.

Elliott Laboratories, as duly authorized agent prepared this submittal. A copy of the letter of our appointment as agent is enclosed.

If there are any questions or if further information is needed, please contact Elliott Laboratories for assistance.

Sincerely,

A handwritten signature in black ink that reads "David W. Bare". The signature is written in a cursive, flowing style.

David W. Bare
Chief Technical Officer
