## **Request for Confidentiality**

Subject: Confidentiality Request for: E5MDS-GPA-1, RF amplifier, IC 101D-GPA-1

Pursuant to FCC 47 CRF 0.457(d) and 0.459 and/or RSP-100, the applicant requests that a part of the subject FCC and/or IC application be held confidential.

and/or IC application be held confidential.		
Type of Confident Short Term	Permanent  Permanent  Permanent  Permanent  Permanent  Permanent  Permanent  Permanent  Permanent  Permanent	Exhibit Block Diagrams External Photos Internal Photos Operation Description/Theory of Operation Parts List & Placement/BOM Tune-Up Procedure Schematics Test Setup Photos User's Manual
Having the subject information developing this product. Not product.	easily available to "com	g this product and it is one of the first of its kind in industry. petition" would negate the advantage they have achieved by e design will result in financial hardship.
<b>Permanent Confidentiality:</b> The applicant requests the exhibits listed above as permanently confidential be permanently withheld from public review due to materials that contain trade secrets and proprietary information not customarily released to the public.		
period of <u>NA</u> days from the dat premature release of sensitive in aware that they are responsible	e of the Grant of Equipn nformation prior to mark to notify FCC in the eve	ort term confidential be withheld from public view for a nent Authorization and prior to marketing. This is to avoid teting or release of the product to the public. Applicant is also nt information regarding the product or the product is made nents listed above for public disclosure pursuant to FCC
		stry Canada distinguishes between Short Term and Permanent l simply be marked Confidential when submitted to IC.
Sincerely,		

¹ - The asterisked items (\*) require further justification before permanent confidentiality will be allowed. These also currently require review by the FCC under their Permit-But-Ask policy before the grant is issued and can delay completion of an application. Further justification should be added to the note above. One such example for a potted device would be: "The EUT is FULLY potted using a non-removable epoxy based material. Removal of potting material causes irreparable damage to internal circuitry. See photographs exhibits that outline the device before and after potting."
