Request for Confidentiality

Subject: Confidentiality Request for: <u>E5MDS-GPA-9</u>, <u>RF amplifier</u>, <u>IC 101D-GPA9</u>

Pursuant to FCC 47 CRF 0.457(d) and 0.459 and/or RSP-100, the applicant requests that a part of the subject FCC and/or IC application be held confidential.

and/or IC application be held co	onfidential.	
Type of Confider Short Term	Permanent Permanent Permanent Permanent Permanent Permanent Permanent Permanent Permanent Permanent	Exhibit Block Diagrams External Photos Internal Photos Operation Description/Theory of Operation Parts List & Placement/BOM Tune-Up Procedure Schematics Test Setup Photos User's Manual
Having the subject information	easily available to "com	g this product and it is one of the first of its kind in industry. petition" would negate the advantage they have achieved by e design will result in financial hardship.
		nanently confidential be permanently withheld from public coprietary information not customarily released to the public.
period of <u>NA</u> days from the dat premature release of sensitive is aware that they are responsible	te of the Grant of Equipm nformation prior to mark to notify FCC in the eve	ort term confidential be withheld from public view for a ment Authorization and prior to marketing. This is to avoid teting or release of the product to the public. Applicant is also ent information regarding the product or the product is made ments listed above for public disclosure pursuant to FCC
The applicant understands that until such time that Industry Canada distinguishes between Short Term and Permanen Confidentiality, either type of marked exhibit above will simply be marked Confidential when submitted to IC.		
Sincerely,		

¹ - The asterisked items (*) require further justification before permanent confidentiality will be allowed. These also currently require review by the FCC under their Permit-But-Ask policy before the grant is issued and can delay completion of an application. Further justification should be added to the note above. One such example for a potted device would be: "The EUT is FULLY potted using a non-removable epoxy based material. Removal of potting material causes irreparable damage to internal circuitry. See photographs exhibits that outline the device before and after potting."
