RE: ATCB ID: ATCB005585, FCC ID: E5MDS-MERCURY900

There was a mistake in filing for the Class II permissive change for FCC ID: E5MDS-MERCURY900.

In the original application and grant, the frequency range was listed as 904-926 MHz. The radio supported a 3.5 MHz bandwidth.

In the Class II permissive change, a software only change was made that allowed for the product to operate with a 1.75 MHz bandwidth. This allowed for additional channels.

The application and grant for the Class II permissive change should list the frequency range as 903-927 MHz, not 904-926 MHz.

Best Regards,

A handwritten signature in blue ink that reads "David Guidotti". The signature is fluid and cursive, with a large initial "D".
