**Applicant: Microwave Data Systems Inc.**

**Product: MDS SD4 transceiver**

**FCC ID: E5MDS-SD4**

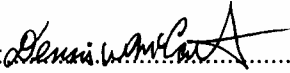

Dear Sir/Madam,  
Elliott TCB  
684 West Maude Ave.  
Sunnyvale, CA. 94085

GEMDS is requesting a Permissive class 2 change to the SD4 transceiver. We have upgraded the software to allow 6.25KHz channels. The only hardware change made was to add a tighter tolerance TCXO for the frequency stability. The new part is pin for pin compatible with the part it replaces.

Full testing was completed and passed for submission.

If you have any queries, please do not hesitate to contact me at 585 242-8440:

Yours truly,

Signed:  ..... Name: Dennis McCarthy .....
