After a review of the submitted information, I have a few comments on the above referenced Application.

Administrative Issues:

- 1) Please provide a separate labeling exhibit information (sample label and photograph of location).
- 2) FYI....The spacing between components should be positioned 10 cm apart from each other. It appears these items were much farther than 10 cm apart (about 20 cm on components on the front, 40 cm on components on the back of the table). Additionally, the keyboard should be centered on the monitor. Please be correct this issue on future applications.
