

SECTION 2.1047: MODULATION CHARACTERISTICS

Not applicable. EUT is a power amplifier.

SECTION 2.1049: OCCUPIED BANDWIDTH

TEST SETUP FOR OUTPUT:

Minimum Requirement:

Section 2.1049(i);

Transmitters designed for other types of modulation-when modulated by an appropriate signal of sufficient amplitude to be representative of the type of service in which used. A description of the input signal should be supplied.

Test Procedure:

The Eut's occupied bandwidth is compared to the input source plot (signal generator) and output plot (power amplifier) to check that the input signal bandwidth is not greater at the output of amplifier.

Use the setup for output shown above. Correct for external attenuation and cable loss. Set the power amplifier to the maximum output gain. Using the marker delta function, measure the 20dB bandwidth of the EUT's emission. Record the spectrum analyzer plot.

Use the setup for input shown above. Correct for external attenuation and cable loss. Using the marker delta function, measure the 20dB bandwidth of the signal generator's emission. Record the spectrum analyzer plot.

Test Results:

SECTION 2.1051: SPURIOUS EMISSION AT ANTENNA TERMINALS**TEST SETUP:****Minimum Requirement:****Section 22.917(e):**

For Base stations transmitters the magnitude of each spurious, harmonic, and intermodulation emissions that can be detected when the equipment is operated under conditions specified in the instruction manual and/or alignment procedure, shall not be more than $43 + 10 \log (P)$ dBc below the mean power output, which is equivalent to -13 dBm.

Test Procedure:

Input 2 modulated signals to the amp to produce 180 watts composite power. Set the RES Bw: 30kHz and the DISPLAY LINE to -13 dBm. Scan the Eut from 1MHz to the 10th harmonic of carrier and check for spurious, harmonic, and intermodulation emissions.

Test Result:

Plots were taken with 2 inputs at the high end of the band and with 2 inputs at the low end of the band. Plots were of the intermodulation products and of the out-of-band emissions from 1MHz to the 10th harmonic of the carrier frequency.
