Subject: RE: Powerwave Technologies Inc. FCC ID:E675JS0067, AN03T2947

Hello Mike,

Question #1: Please provide justification for requesting internal photos as confidential document.

Answer: <Powerwave Comments> We would like to proceed with requesting confidentiality for the internal photos. I have highlighted in the document you provided the section I believe applies. In four of the attached photos (photos with single model nos.) we are using a process that is not known to the general public/industry. We prefer not to make this publicly available. We feel our product falls into the category stated below. It is sold to only one customer and is serviceable by Powerwave or a licensee. It is definitely not accessible by the general public. "Another example is when a non-consumer device is not accessible by the general public, such as a device mounted on the top of a large tower (or in a fenced enclosure) that is only serviceable by the licensee or his designated technicians."

Thank you!
Helen
