

Non-Conformities FCC ID: E675JS0095 (CKC CS Ref # E07-000113-FCC-01)

The items listed below represent requests for information following review of this application for certification under United States (FCC) regulations. Further question may arise pending review of responses to these items.

| OK | # | Non-Conformity or Comment | Submitted Response |
|-----------|----------|---|--|
| X | 1 | The application form lists frequency range of 1930-1995MHz for three of the equipment specifications and 1930-1990MHz for the last. Please clarify if this is correct. | All specifications should be 1930-1995MHz. |
| X | 2 | Please provide information on the minimum operating power. | The minimum operating power is 0dBm |
| X | 3 | The application lists four different equipment classes, however the operational description and users manual only addresses CDMA (F9W) modulations. Please clarify whether the information provided accurately reflects the equipment under review. | The amplifier can be used in those different equipment classes. The manual only states CDMA per customer's preferences. The manual can be adjusted to suit the customer's needs. |
| X | 4 | The output power listed in the application form is 66.7 watts, however the composite output is 200 watts. Please clarify the intended output power rating. | Power listed should be composite. |
