FCC ID: E8HMG-0856	
	Operational Description
	The transmitter of the EUT (Wireless Mouse) is powered by 3.0Vdc from batteries. The type of antenna is Strip antenna. The output power of this device is very low. Under normal use condition, the transmitter and the receiver are quite close, so high EIRP power is neither necessary nor allowed because of interference.

Report No.: RF971211A04-1
