

User's Guide for Wireless Input Device

A. FEDERAL COMMUNICATIONS COMMISSION (FCC) STATEMENT

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, Pursuant to Part 15 the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help

WARNING:

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

CAUTION: AVOID PROLONGED USE OF THE KEYBOARD WITHOUT BREAKS. Take regular breaks and keep a good posture. Consult your physician promptly if you notice any loss of motion or pain in your wrist when using the keyboard.

B. PRODUCT SPECIFICATION

1. Frequency Band: Mouse 27.045 27.095
2. Channel: 2 channels for mouse
3. Frequency Modulation: FSK mode
4. Power Rating:
Mouse 3V, 50mA (max)
Receiver 5V, 100mA (max)
5. RF Power: <10mW
6. Battery Life Time:
Mouse: 50 working hours with continuous operation
7. Operating Temperature: 0°C ~ 40°C
Storage Temperature: -10°C ~ 60°C

C. HARDWARE INSTALLATION

1. Plug the receiver connector into USB port on your computer
2. Load two AA batteries to battery chamber of mouse

D. CHANNEL SETTING WHEN INTERFERENCE OCCURS

1. The first binding by user
Step 1 – Push the button on receiver
Step 2 – Push the button on back of mouse
2. Change channel
Push the button on the back of mouse
Alternate:
Step 1 – Press receiver button, LED green light is blinking
Step 2 – Push mouse button on back of device and then LED light stops blinking on receiver to confirm channel is changed.
3. Change ID
Step 1 – Press receiver button, LED green light is blinking.
Step 2 – Push the button on the back of mouse more than two seconds and release, LED green light becomes blinking faster in 3 seconds and then light is off.

Note: To have maximum performance, avoid placing receiver, keyboard and mouse on metallic surface. Operating distance between keyboard, mouse and receiver will depend on the environment around. User can try various locations for the receiver in order to find best operating performance.
