

A white rectangular electronic component, possibly a sensor or actuator, is shown resting on a wooden surface. The component has a white plastic housing with a central rectangular area outlined in black, labeled "LABEL LOCATION". Above this area, there is a stack of thin, white, rectangular layers. On the left and right sides of the component, there are metal flaps or mounting tabs, each secured with a small screw. At the bottom of the component, several colored wires (white, blue, green) are visible, extending downwards. A grey pen is partially visible in the top right corner of the frame.
