## **Modular Approval Letter**

FCC ID : \_\_\_\_\_\_, is seeking FCC Authorization as a

**Single Modular transmitter / Single Limited Modular Approval** (please check one)

The EUT meets the requirements for:

Single Modular approval / Single Limited Modular Approval (please check one)

as detailed in KDB 996369. Compliance to each of the requirements is described below:

(i) The radio elements of the modular transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements. X   (ii) The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part 15 requirements under conditions of excessive data rates or over-modulation. X   (iii) The modular transmitter must have its own power supply regulation. X   (iv) The modular transmitter must comply with the antenna and transmission system requirements of §5 15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable). The "professional installation" provision of § 15.203 is not applicable to modules but can apply to limited modular approvals under paragraph (b) of this section. X   (v) The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. X   (vii) The modular transmitter must be apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization. X   (viii) The modular transmitter must comply with any applicable Be exposure requirements in this final configuration. X	Modular Approval Requirement	Yes	No	Please provide a detailed explanation if the answer is "No."
may be located external to the shielded radio elements. X   (ii) The modular transmitter must have buffered X   modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part X   15 requirements under conditions of excessive data rates or over-modulation. X   (iii) The modular transmitter must have its own power supply regulation. X   (iv) The modular transmitter must comply with the antenna and transmission system requirements of §§ 15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable). The "professional installation" provision of § 15.203 is not applicable to modules but can apply to limited modular approvals under paragraph (b) of this section. X   (vi) The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. X   (vii) The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be lincluded in the application for equipment authorization. X		Х		
(ii) The modular transmitter must have buffered X   modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part X   15 requirements under conditions of excessive data rates or over-modulation. X   (iii) The modular transmitter must have its own power supply regulation. X   (iv) The modular transmitter must comply with the antenna and transmission system requirements of §§ 15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable). The "professional installation" provision of § 15.203 is not applicable to modules but can apply to limited modular approvals under paragraph (b) of this section. X   (vi) The modular transmitter must be tested in a stand-alone configuration X X   (vii) The modular transmitter must be quipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. X X   (vii) The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization. X   (vii) The modular transmitter must comply with any applicable X X				
modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part15 requirements under conditions of excessive data rates or over-modulation.(iii) The modular transmitter must have its own power supply regulation.(iv) The modular transmitter must comply with the antenna and transmission system requirements of \$\$ 15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable). The "professional installation" provision of \$ 15.203 is not applicable to modules but can apply to limited modular approvals under paragraph (b) of this section.(v) The modular transmitter must be tested in a stand-alone configurationX(vi) The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.X(vii) The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements.
