

## STATEMENT OF ATTESTATION

DXS-LRW - Remote Control Transmitter

FCCID:EF4LRW

The equipment under test is a low powered portable transmitter that is typically used as an emergency signaling transmitter for security systems. Optional supervisory signals may be provided by this transmitter.

The PCB assembly is the same as is used with the EF4LRP transmitter. Due to marking requirements from ETL, we must change the FCC ID number to add this alternate construction. Internally these two products are identical.

This equipment has been tested in accordance with the requirements contained in the appropriate Commission regulations. To the best of my knowledge, these tests were performed using measurement procedures consistent with industry or commission standards and demonstrate that the equipment complies with the appropriate standards. Each unit manufactured, imported or marketed, as defined in the Commission's regulations, will conform to the sample(s) tested within the variations that can be expected due to quantity production and testing on a statistical basis.

I further certify that the necessary measurements were made by Linear LLC, 1950 Camino Vida Roble, Suite 150, Carlsbad, California. 92008.
