Overview

This application for a Class 2 Permissive Change of FCC ID: EHA-05CN3, a CN3 handheld computer with an MC75 GSM/GPRS/EDGE radio module installed. The Class 2 Permissive Change is to allow for a larger keypad on the CN3 (Stretch CN3). No changes have been made to the radio or antenna path.

SAR testing has been performed on the radio due to the change in the host device. Please note, the SAR report lists FCC ID: EHA-08CN3. This is the FCC ID for the CN3 device with the MC75 GSM/GPRS/EDGE radio module installed and a DHIB Bluetooth/WiFi combo radio installed.

This opinion is based only on the changes made, specifically the SAR, EIRP and out of band emissions addressed.

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
