Subject: Application for Original Certification, FCC ID: EHA-1015CP01X1

Dear Application Examiner,

Intermec Technologies Corporation is submitting this application for certification of model 1015CP01 (**CN51**).

(Marketing brand name), under FCC ID: EHA-1015CP01X1. The device is a handheld computer containing radio module the Murata Wireless Solutions LBEH1Z9PFC. The LBEH1Z9PFC module is an 802.11 a/b/g/n -Bluetooth radio, System authorization is sought under FCC 15.247 and FCC 15.407. Internal and external photos for the device have been submitted with this application. Please note that brand names instead of model numbers are used in the some of the exhibits.

The 802.11 and Bluetooth radios share their antenna and cannot transmit simultaneously. A SAR evaluation was performed including analysis of 3 body worn holsters with 19mm minimum spacing.

The radio can operate in the DFS frequency bands as a client device only. It has no radar detection and no ad-hoc capability. A DFS test for a client device was performed.

The antenna is integral to the handheld computer and is not user accessible, therefore compliant to FCC 15.203 unique antenna connector requirements.

Your efforts in reviewing this application are greatly appreciated. Please contact me if there are questions or additional information needed concerning this request.

Sincerely,

A handwritten signature in black ink, appearing to read 'David Schramm'. The signature is fluid and cursive.
