To whom it may concern:

This letter is intended to explain the usage of the Intermec Technologies Corporation 6820 printer. The 6820 printer is designed to print 8.5" x 11" letter sized receipts. It can be used in permanent or vehicle mounted applications. The 6820 can be powered by an optional attached AC adapter, or from a vehicle's power system. The 6820 has provisions for an Intermec hand held computer terminal to be held in a built-in docking station that allows terminal battery charging and data communications from the terminal to the printer.

A typical use of this printer is in a "Route Delivery" inventory control system. The Intermec hand held computer processes the inventory delivery information, and the 6820 prints the invoice for the delivery driver to give the customer when the delivery has been completed. The 6820 printer can be temporarily operated from an integrated battery pack if the driver plans to carry the printer from the delivery vehicle onto the customer site to print the receipt. The internal battery and carrying handle are both options for the 6820 printer.

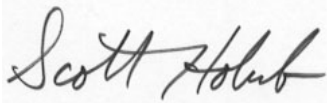

The size of the 6820 printer precludes it from body or head worn usage. Intermec also provides only the optional carrying handle for portable printing applications, no method (belt clip, holster, shoulder strap, etc.) of carrying this printer near the body or head is available.

The dimensions of the 6820 printer in the portable configuration are:

Length: 16.75"  
Width: 19.00"  
Depth: 8.00"  
Weight: 12.75 lbs.

Please contact me using the information below if there are any questions.

Sincerely,

A handwritten signature in black ink that reads "Scott Holub".
