Subject: Limited Modular Approval FCC ID: EHA-CK3DHIB

Dear Application Examiner:

Intermec Technologies Corporation is submitting an application for certification of the DHIB radio, FCC ID: EHA-CK3DHIB. Limited modular approval under FCC 15.247 is sought. The DHIB radio is contained in the Intermec CK3 Series handheld computer.

There are two RF Exposure conditions for the CK3. First, it can be used in a holster next to the user's torso, so a SAR Evaluation was performed. Second, the CK3 can also be used while connected to the Intermec IP30 RFID reader. In this configuration, only hand-held use is possible (greater than 20 cm from the user's torso), so MPE estimates were performed for the co-located radios.

The IP30 contains two previously certified radio modules, model IM4, FCC ID: EHAIM4 and model BTM4, FCC ID: EHA-BTM4. No changes have been made to the hardware or software of the radio in these co-located configurations.

Your efforts in reviewing this application are greatly appreciated.

Please contact me by telephone at (425) 356-1765 or by e-mail (sean.mackellar@Intermec.com) if there are questions or additional information needed concerning this request.

Sincerely,

A handwritten signature in black ink, appearing to read "Sean MacKellar", is written in a cursive style.
