Michael Kuo  
Compliance Certification Services, Inc.  
47173 Benicia Street, Fremont, CA 94538

Dear Mr. Kuo:

This letter is a request that Compliance Certification Services (CCS) initiate the Change in Identification procedure described in FCC 2.933. The only module changes associated with this request involve labeling and product identification.

The result of this effort will be to create a new FCC ID based on the Qualcomm radio module FCC ID designation and utilizing Intermec Technologies' FCC authorized Grantee Code (EHA).

The identity of the originating unit is Qualcomm radio module, model FENWAY, under FCC ID: J9CFENWAY-1. The designated Intermec Technologies radio module associated with this Change in Identification will be Intermec module, model "RC10" with a new module FCC ID: EHA-RC10.

For this effort, the following documentation accompanies this letter:

- A label drawing from Intermec Technologies illustrating the FCC ID marking and its approximate location on the RC10
- A total of 2 photographs of the RC10 module
- Authorization letter from Qualcomm Incorporated, which has already been received by CCS.

Please advise me when this effort has been completed. And if you have any questions or concerns relating to this request, do not hesitate to contact me by telephone at (319) 369-3541, or by email at [stu.adams@intermec.com](mailto:stu.adams@intermec.com).

Sincerely,

Stuart Adams  
Manager, Product Regulatory Compliance
