

The Intermec logo is written vertically in a bold, blue, sans-serif font. To its right is a large, faint, light-blue graphic consisting of several overlapping circles and lines, resembling a network or orbital diagram. Below the logo is a small blue square containing a white geometric pattern of overlapping circles and lines.

Dear Sirs,

Intermec Technologies Corporation would like to add the 751G model number to our EHA2610CF grant. The 751G model hand held computer was created as a special configuration requirement for a United States government contract. The new model number allows Intermec to control changes to this configuration, which is a contract requirement. The 751G model device is electrically and mechanically identical to the 700C model, and will continue to be so in the future. There will be no changes to the EHA2610CF radio or antenna in the 751G host device. All of the exhibits on file with the Commission will be representative of the radio.

Please contact me if you have any questions regarding this attestation.

Sincerely,

Scott Holub  
Regulatory Compliance Engineer  
Intermec Technologies Corporation
