FRN: 0003-7251-65 (CR) or 0003-7296-54 (Everett)**

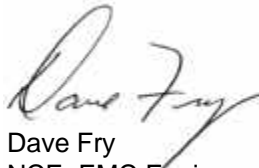

**Dear Sirs,**

Intermec Technologies Corporation is applying for additional co-located transmitter approvals for the above listed radios. These transmitters are listed under FCC Identification as a mobile device and as a portable device. The test reports published by Northwest EMC reference the FCC ID for the portable approvals. The radios used for both mobile and portable remain the same. Test reports that address co-location emissions testing with reference to the mobile identification are also applicable to the portable approvals referenced in this application for permissive change.

Time to market and regulatory delays required approval of the mobile device via the TCB process. The co-located transmitter certification for portable devices required FCC approval with substantial delays. The products whether mobile or portable are identical in construction.

Contact me if you have any questions regarding this attestation.

Sincerely,

A handwritten signature in black ink that reads "Dave Fry".

Dave Fry  
NCE, EMC Engineer
